Never stand still!

Last year we reported here how our writing instruments contribute to improved everyday living and help preserve a worthwhile environment. Nothing has changed here – at least in terms of the principles.

But as far as our practical efforts are concerned, we're now working consistently on a number of projects to further improve the usefulness and environmental compatibility of our products. And here we certainly do have news to report.

We have achieved a milestone in the production of writing instruments made of bio-based plastic, for example. We launched the first product of this kind a few years ago, the K 3 ball-point pen, and this was followed by two series of fineliners and fibrepens in 2016 featuring a vast range of colours - Link-It and Line-Up. In this case we managed to combine hard and soft bio-based plastic for the first time.

The next in line is now the Slider Xite, the latest member of the successful Slider family (also known as "The page surfer"). Its casing is made of 90% bio-based PLA, extracted from maize and sugar beet. The concept is geared towards both design and durability, also a contribution to sustainability. After all, the Slider Xite is an article of day-to-day use which people like to keep and refill, not least because of its simply perfect design and writing properties thanks to Viscoglide® technology. In this way we are making our own statement against the general throwaway trend.

To find out exactly what bio-based plastic is and what advantages it offers, see the next page. But we can tell you right here that using it saves the finite resource of crude oil as well as reducing CO₂ emissions.

There are other areas in which we keep moving ahead, too. In a highly competitive market, any standstill actually means a step backwards: as our business partner, you know that just as well as we do. This is why we're constantly in search of worthwhile ways to expand and supplement our range - which you stand to benefit from too, of course.

In spring 2016 we concluded a cooperation contract with MolotowTM, a well-known provider of spray cans, markers and other art supplies. The first stage will be to take over sales of the MolotowTM fine arts range for Germany, Austria and other countries, and this will be followed by collaborative work in the area of technology development. One thing we especially like is the fact that Schneider and MolotowTM think along the same lines when it comes to sustainability, fairness, "made in Germany" and product quality. That's an excellent basis for success.

And our One is already a success - it's certainly got off to a successful start, at least. Launched in January 2015, our ink rollerball has sold extremely well - much better than we ourselves were expecting. A real "superroller" that is loved not just by school pupils, university students and those starting their career but also office professionals.

Success creates a connection – and on this note I wish you all the best and look forward to staying well connected with you.

Yours sincerely,

Christian Schneider

MOLOTOW™

The plastic made from nature itself

What is bio-based plastic?

Bio-based plastic are those made from renewable raw materials such as maize starch, cane and beet sugar, vegetable oils, cotton cellulose and wood. Bio-based plastic such as BioPE, BioPET, cellulose acetate and PLA save natural resources and generate lower levels of CO₂-emissions on average. They differ from recycled plastic: the latter also saves resources due to the fact that is re-used, but it is originally produced in the conventional way.

The Schneider bio-fleet

We started making products out of bio-based plastic several years ago. A key aspect for us is that the quality of the writing instruments has to be equal to those made of conventional plastic – and this takes time to achieve. After our “bio-neer” the K 3 Biosafe, we now also offer the fineliners and fibrepens Line-Up and Link-It, as well as the ballpoint pen Slider Xite, the latest addition to the popular Slider family.

Where are things heading?

We certainly intend to keep moving forward. At the moment we’re testing the use of recycled plastic (see above) and we’re thinking in concrete terms about laying the foundations for another step forward: the use of recycled bio-based plastic, i.e. combining both types of environment-friendly plastic.

For details, see www.schneiderpen.com/faq

We Care

Not just organic plastic – for decades we've made a point of producing our writing instruments in ways that are as environmentally compatible as possible. We have been EMAS certified since 1998 - so we are the first company in the industry to have joined the world's most demanding environmental management system. As a result we have implemented an impressive series of measures dedicated to enhancing sustainability. Here is a selection:

- Recycling of 85% of production waste
- Use of renewable energy only
- Modern, energy-efficient machinery
- 50,000 kilometres per year of car travel saved by using e-bikes as company vehicles
- Packaging consisting of 80% waste paper
- 90% of raw materials from Europe
- Certified compensation of unavoidable CO2 emissions generated by the entire Slider series and the promotion ballpoint pen Like.

In this way, every product made by us has contributed enormously to environmental protection – including those that are not made of organic plastic. Of course, we don't write 'Organic' on them in this case – but instead our motto: "We Care".

Find out more at www.schneiderpen/we-care: you can also download our sustainability report here.

Getting things moving

We never stand still – and this doesn't just apply to sustainability but to our communication as well. And this time we mean it literally: moving images are once again to be seen in Schneider advertising.

A loving heart for a lasting message

With a dash of tongue-in-cheek humour, the commercials focus on the advantage of writing with a Schneider ballpoint pen: a courting couple draw a heart in the sand, but some other beach-goers wipe out their symbol. The same thing happens when the couple scratch a heart into a rock face – an eagle, a bear and an amateur athlete quickly make it disappear again. It's so much more effective to express your feelings using a tried-and-tested Schneider writing instrument.

France 2016: La Grande Première

France was chosen as the starting point – so as to raise our profile in this important market and also with the idea of tapping into the Olympic Games as a crowd-puller. So we developed commercials to be broadcast on the French TV channels France 2, 3 and 4 during the Rio Olympic Games - reaching millions of people.

Emotion on the big screen

In German cinemas the commercials have generated lasting contacts with the Schneider brand. Wobblers for displays and shop deco demonstrate that the impact can be maintained and even reinforced on your premises.

Thousands of clicks

With its appealing wit and charm, our campaign went down well with consumers on the social web. The commercials and stories were shared and clicked thousands of times. We have placed pre-roll ads on the world's biggest video platform YouTube and these have been played several hundreds of thousands of times – and an emotional brand contact is created on each occasion. We're not the only ones to gain from this: you benefit substantially in terms of retail, too.

Ballpoint pens

Schneider ballpoint pens are designed for everyday use. Functional design, high quality and a long shelf life are especially important to us. Some examples: Plug+Play, the universal fit for different refill formats makes refilling easy. A rotation mechanism rotates the refill by 45 degrees with each click, so that the tip is being used evenly on all sides. Wear-resistant stainless steel tips guarantee that the big ink reservoir can be used up completely without any smear marks. Schneider ballpoint pens have thus become a leading brand worldwide.

Slider is the new innovative ballpoint pen with Viscoglide®-technology for exceptionally smooth and easy writing. Other smooth writing instruments cannot meet the shelf life and easy handling of the Slider ballpoint pen. The writing dries quickly - even on smooth paper – and is wipe-proof even when highlighting it later on.

Slider Xite

- Ballpoint pen with pen body made of 90% biobased plastic
- Viscoglide® technology for extraordinarily easy and gliding writing
- Replaceable metal refill Slider 710 XB with wear-resistant stainless steel tip
- Ink colour recognisable at the push button
- Waterproof according to ink standard ISO 12757-2 (except red)
- Replaceable with any of the other Plug+Play refills

Fountain pens and cartridge rollerballs

For any student who writes a lot, Schneider writing instruments offer pioneering ergonomic qualities for long and effortless writing. Fountain pens promote the development of good writing for beginners and experienced writers develop their personal writing style. Cartridge rollers are a complement to fountain pens and a good choice for prolific writers in school and at the university.

Breeze is a new ergonomic cartridge roller for casual writing. Design, ergonomics and writing properties appeal to pupils of all ages, students and young adults. Breeze has a soft feel and writes extremely effortless. Breeze writes using the newly developed roller cartridge 852. This sets new standards in terms of its smooth writing and exceeds all its predecessors. An ink regulator ensures constant ink flow from start to finish. The new ink formula is even faster drying and smudge proof when highlighting.

Base Senso

- Cartridge rollerball with warning light at the end of the pen
- Indicates when too much writing pressure is exerted
- Ideal for beginners and for people with motoric difficulties
- Ergonomically shaped grip
- Replaceable rollerball cartridge 852 with ball tip
- Ink colour royal blue, erasable
- Ink dries quickly and is smudge proof when highlighting it later on
- Large finger areas avoid pressure points
- Rubberised for elasticity and to prevent slipping

Rollerballs

Liquid ink is something that we have all been familiar with since we first started learning to write. Rollerball pens come with a variety of tips and ink formulations which not only serve specific purposes with different line thicknesses but are also decisive for writing comfort. The Ultra Smooth tip offers the best user sensation for promoting fast and efficient writing. Other highlights are the patented hybrid tips with sheath and ball mounting made of wear-resistant stainless steel. The ball is mounted elastically on a plastic bearing, which makes the rolling motion particularly smooth and pleasant.

The "One" series is set to be the next generation of rollerball pens. Its "super flow" system ensures a consistent flow of ink from start to finish. The ink is stored in the tank in liquid form. This enables a high filling capacity with nothing remaining behind in the fibres. A regulating system balances out deviations in temperature and air pressure and also protects the pen against leakage.

One Business

- Rollerball with ultra-smooth tip for the best writing experience
- Line width approx. 0.6 mm
- Waterproof according to ink standard ISO 14145-2
- Super-Flow-System for consistent ink flow
- Large ink reservoir with level indicator
- Cap-off ink does not run dry even if the cap is removed for 2-3 days
- Ergonomically rubberised surface
- High-quality metal clip

Fineliners and Fibrepens

Their outstanding qualities have established Schneider fineliners and fibrepens as firm favourites in terms of meeting day-to-day writing needs. The ink, reservoir and tip are perfectly matched physically so as to create an even stroke. The fine tips are stabilised with a stainless steel tube which also allows the pens to be used with rulers and stencils.

The Line-Up and Link-It series set milestones in terms of further development. The enormous range of colours makes for even more varied range of applications, as does the possibility of combining different tips and colours in the Link-It series. Pen boxes with fold-up lids are a convenient way to keep everything tidily in place. The casings made of bio-based plastic are a new feature: they save finite resources and improve the CO₂ footprint.

Link-It

- Click! The first modular system that cleverly links two pens
- Ideal for writing, painting, collecting and swapping
- Pen body made of 88 % biobased plastic
- Cap-off ink does not run dry even if the cap is removed for 2-3 days
- Individual or linked - the slim design fits in each pencil case
- Slip-proof thanks to the rubberised three-edged design
- Can be held comfortably as individual pen as the cap fits on the end of the barrel

Markers

Schneider offers solutions for all kinds of applications: highlighters, permanent markers, combination markers for whiteboards and flipcharts, universal permanent and non-permanent markers, paint markers, chalk markers and more. All of them in different colours and line widths. The best quality for the application, safety of the inks used and the protection of resources are prime objectives of development. There are easy re-fill systems available for almost all markers.

Major improvements were achieved with the combined markers for whiteboards and flipcharts. More ink increases the output and creates more visibility. Yet the combined marker works without limitations - writing can be erased from whiteboards without residue and on flipcharts the ink does not seep through the pages underneath. The new highlighter Job combines high performance with beauty. In 2013 its contemporary clear and minimalist design was awarded the prestigious iF and reddot design awards.

Job

- Smart highlighter for brilliant results
- Chisel tip for line widths 1 + 5 mm
- Universal ink for standard, copy and fax paper
- Intensive colours, light-resistant ink
- Refillable with Refill station Maxx 660
- Barrel parts made from anti-evaporation PP for long-term shelf-life
- Cap with practical clip
- Awarded the iF and reddot design award

The flexible packaging solution

For custom-designed packaging wishes we offer bags in two different sizes. Almost all Schneider products can flexibly be packaged as required. The bags are generally provided with the Schneider brand logo and an eurohole.

Please note, however, that machine packaging is not possible for this kind of packaging, therefore it is only available upon request!

Easy pack (6,0 × 23 cm)	Ref. No.
1-2 ballpoint pens, rollerballs, fountain pens or 1 highlighter, marker or 1-3 ink eraser Corry	231390
Easy pack (8,0 × 23 cm)	Ref. No.
up to 4 ballpoint pens, rollerballs or 2 × highlighters or ink cartridges	231391

bag made of environmentally friendly material (PP)

individual assembly

Examples for individual Easy pack versions:

Types of blister cards:

1. Standard blistercard, PET foil on blistercard
dimensions 6.7 × 23.0 cm
2. Blistercard for refills, PET foil on blistercard
dimensions 4.7 × 17.5 cm
3. Sightpack (double blistercard), PET foil on PET foil with card board inlay
dimensions 11 × 21.4 cm
4. Sightpack (double blistercard), PET foil on PET foil with card board inlay
dimensions 16.8 × 21.4 cm

Card size:

Standard blister cards are produced in the dimensions of 6.7 × 23. cm. To produce special custom-designed cards without any additional costs, these dimensions must strictly be adhered. Individual sizes have to be discussed with Schneider in advance. In addition to the standard blister cards we are offering as well high-quality double blister cards for individual assemblies. Please contact us for further information.

Tools:

Cards that differ from the standard assortment have to be discussed with Schneider in advance. We reserve ourselves the right to charge tools that are particularly complex and expensive in accordance to the effort.

Card layout:

The layout of special blister cards is preferable made by the customer or his advertising agency. The creation of card variants by Schneider however is in principal possible. Therefor we need exact colour and CI-defaults from the customer. We reserve ourselves the right to charge the incurred expenses for creating a blister card layout according to the effort.

Minimum order / Release order quantities:

The minimum order quantity for customer specific cards lies between 5,000 and 10,000 cards per type according to the complexity and type of card. The minimum release order quantity for customer specific cards is 2,000 cards per type.

Delivery times:

After having settled all the necessary details, the delivery time for the products on special blister cards is approx. 6-8 weeks for the first delivery. The following deliveries will take 2-3 weeks after incoming order.
