**The Family Owned Manufacturer of Pencil Sharpeners and Drawing Equipment
since 1919 based in Germany**

KUM® is a manufacturer of pencil sharpeners, drawing instruments, cosmetic sharpeners and other products for school, office and advertising. German Production, quality and precision from A to Z.

KUM® has over 90 years of production experience.

Our philosophy is: creativity, quality, tradition and customer service.

WE ARE HERE FOR YOU!

Product Safety and Regulations..

Our products should not only be fun and fulfill their function perfectly but should also be safe. It may have harmful effects when humans put products in their mouth that contain phthalates. A study by the Department of Environmental Medicine of the University of Erlangen has proven this. Tests showed that phthalates have an effect on the hormonal balance. Small children are especially sensitive. KUM® has paid close attention for many years to produce products without these harmful substances. Please also inform your customers about this!

REACH

We adopt the status of a Downstream-User and also in one case as importer, for the supply chain described within the REACH-Regulations. The pre-registration has been submitted.

EN 71-3

All our products are in accordance with the regulations defined in EN 71-3

Packaging

Our sales and transport packaging are in accordance with the 5th Amendment of the Packaging Decree

We reserve the right to change prices, packaging and colours due to economic necessity or necessary ecological adjustments.

OUR ADDRESS...

Our post box address has a different postal code than our street address, as shown below. Both addresses are for the same building.

KUM® GmbH & Co. KG

KUM®
LUXURY PENDULUM

KUM®
LUXURY PENDULUM
108.07.11

Products for the left-handed have been very important for **KUM®** for many years. Many countries forced students to use their right hand in the past. Today it is known that this can have negative effects. In Europe it is estimated that approximately 15% to 20% of the population is lefthanded. In some areas the percentage of lefthanders is believed to be up to 50%. **KUM®** has recognized this trend long ago and is continuously developing and strengthening its position as specialist for lefthanded products. With our range of deco theme sharpeners, flexible left-hand drawing instruments, or attractive left-hand scissors we offer an exciting range of products for lefthanders: writing aids, desk pads...

THE NEWEST DEVELOPMENT BY...
DR. JOHANNA BARBARA SATTLER
 Desk-Pad for Left-Handers

DESK-PAD LEFTY®

Plastic /Desk-pad
 size : 53 x 40 cm / 20 ¾ x 15 ¾ inch
Item# 906.01.19
 Desk Pad Lefty®

DESK-PAD LEFTY® PAPER

Pad of 20 sheets of tear-off paper
 size 42 x 29.7 cm / 16 ½ x 11 ¾ inch
Item# 906.02.19
 Paper Pad – PAPER block- Lefty®

The pattern printed on the **DESK-PAD LEFTY®** for left-handers shows how to place the notebook/paper and hands in such a way that the child will develop a comfortable and relaxed writing position. This desk-pad for left-handers is available as a tear-off pad with graded paper or as a colourful, durable, wipeable plastic deskpad with a non-slip surface. It is a great help to all left-handers – not only at school but also in kindergarten. At this early stage it helps and encourages them to adopt a relaxed position when drawing and making their first attempts at writing. The desk pad will fit on any school desk and should also have a place in the left-handed child's room. It also offers basic support to both converted left-handers who are going back to using their left hand and to patients, who must learn to write with their left hand after losing control of their right hand. Please take into consideration that the inclination angle to the right is ergonomically more favorable but will require some time to get used to. Children that have become used to a different inclination angle for positioning their notebook/paper will sometimes in the beginning react sensitively to this change.

Sit upright with both feet on the ground.

The center of chest should be in front of the triangle.

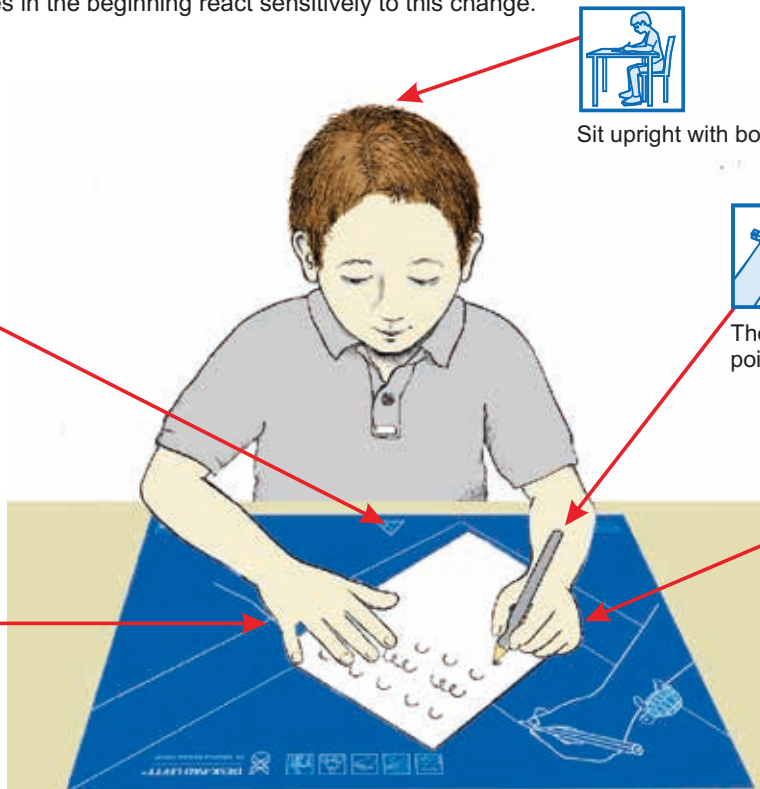

The pencil end should point towards your elbow.

Hold the edge of your paper with your right hand.

Back and forth finger movement - like the head of a turtle.

DESK-PAD RIGHTY®
DR. JOHANNA BARBARA SATTLER

THE NEWEST DEVELOPMENT BY...
DR. JOHANNA BARBARA SATTLER
Desk-Pad for Right-Handers

DESK-PAD RIGHTY®

Plastic / Desk-pad
size : 53 x 40 cm / 20 3/4 x 15 3/4 inch
Item# 512.01.19
Desk Pad Righty®

DESK-PAD RIGHTY® PAPER

Pad of 20 sheets of tear-off paper
size 42 x 29.7 cm / 16 1/2 x 11 3/4 inch
Item# 512.02.19
Paper Pad – PAPER block- Righty®

The pattern printed on the **DESK-PAD RIGHTY®** for right-handers shows how to place the notebook/paper and hands in such a way that the child will develop a comfortable and relaxed writing position. The drawing shows a sheet of paper slightly tilted to the left. This position facilitates a comfortable and ergonomically correct writing position for right-handers. Over the course of time, many right-handers adopt this position and use their left hand as the holding hand on the left side of the sheet of paper. The desk-pad for right-handers also fulfills the need of many right-handed children, who do not want to be at a disadvantage towards left-handed children. It therefore fulfills the requirement of teachers to not have to exclude any groups. At an early stage a relaxed posture while drawing and writing is promoted and practiced. Further, the left hand is assigned a correct position. The desk-pad fits on any school desk and also should be part of the right-handed children's room. This desk-pad is available as a tear-off pad with gradated paper or as a colourful, durable, wipeable plastic desk-pad with a non-slip surface.

Sit upright with both feet on the ground.

The pencil end should point towards your elbow.

The center of chest should be in front of the triangle.

Hold the edge of your paper with your left hand.

Back and forth finger movement - like the head of a turtle.

KUM® Sattler Grip

The Sattler Grip is an innovation which gently guides the fingers into the ergonomically correct writing position.

This product was developed by Dr. Johanna Barbara Sattler together with KUM® to provide an ideal writing aid for left- and right-handed persons.

The advantages of the Sattler Grip:

- Its shape guides the fingers automatically and gently into an ergonomically correct writing position.
- The Pressure Feedback System cushions the pressure and prevents the user from holding the writing instrument too tightly.
- Ergonomically ideal for left- and right-handed persons.
- The pliable and pleasant feeling material is guaranteed free of toxic substances and eliminates the risk of allergenic reaction.
- Fits most pencil-, pen and brush diameters

Passt auf Bleistifte, Farbstifte, Kugelschreiber, Bastelmesser, Pinsel etc.

Righty® & Lefty®

1.)

Lefthanded-Persons place their thumb here. The "L" is upright and readable when held in the **correct writing position**.

2.)

Right-Handed Persons place their thumb here. The "R" is upright and readable when held in the **correct writing position**.

3.)

The **pencil on top** of the grip points **towards the tip** of the pencil, brush, marker etc.

4.)

The **middle finger** is placed on the "M". The **grip points** on the surface immediately indicate the correct positioning of the **middle finger**.

5.)

The **lip** around the recessed grip areas guides the fingers gently into the **ergonomically correct writing position** and prevents fingers from **crossing over**.

Designed by Doctors for Improving your GRIP!

THE RIGHT- AND LEFT-HANDED
EVERY AGE GROUP
EASES ARTHRITIS FINGERS
EASY WRITING
WITHOUT
FATIGUE
WITHOUT
PAIN

The Pencil Grip is a revolutionary applied technology that works with the body's natural physiology to gently place fingers in the proper position for gripping. The Pencil Grip works on pens, pencils, hobby knives, paint brushes and more.

Right-Handed:
 Place thumb on side of grip marked "R"

Left-Handed:
 Place thumb on side of grip marked "L"

The **KUM® MEDI GRIP** uses the body's natural physiology to gently place fingers of right-handed persons into the proper position for sharpening, and therefore ensures a firm grip during sharpening.

Dr. Johanna Barbara Sattler recommends the **KUM® MEDI GRIP** and uses it in her practical work (i.e. child groups)

KUM® SOFTIE® GRIP
MAGNESIUM II DESIGN

Designer 2-hole Pencil Sharpener with **SOFTIE® GRIP** touch pads is equipped with an inner sharpener which is precision-machined from magnesium alloy.

The magnesium inner sharpener is processed with special **KUMINOX** coating. The coating on the magnesium surface of the inner sharpener protects against corrosion, and provides it with an unprecedented silky matte finish, which looks distinctive and elegant.

Circular Protractors, Protractors and so on.

Do you really need all of these drawing instruments?

We believe that the answer is **NO!**

Super Geo 1 unites the most important drawing instruments in one single drawing instrument and makes geometry class **easy** business.

Here the advantages:

- Quick 360° orientation with the Cheat-Point® Circular Protractor.
- Errors in reading are eliminated by the set square.
- The use of the set square is intuitively learned by the integration of the Circular Protractor.
- **KUM®** Stop&Go Grips allow a fix positioning on paper and prevent slipping during parallel- respectively longitudinal translations.

One of the most important components of a sharpener is the blade. **KUM®** blades consist of precision (laser-controlled) sharpened high carbon steel that is razor sharp. These blades are hardened to over 62 HRC, which is much harder than the steel used for quality kitchen knives (approximately 55 HRC) or scissors. **KUM®** blades are mounted with a screw – not rivoted or clamped. This also allows the blades to be replaced with our spare blades. **KUM®** is the only manufacturer worldwide to use curved blades. We call this: **Dynamic Torsion Action®**

For easier recognition, all our blades have **KUM®** Made in Germany embossed in them.

Scissors-Titanium

These titanium scissors were developed to enhance the hardness of the cutting edge. Hardened stainless steel blanks are suspended in a vacuum chamber, and connected to an electric current. A patented feedstock of titanium nitride, chromium nitride, and aluminum is vaporized by electric current. The charged nitrides chemically bond on the surface of the stainless steel blanks, resulting in a very hard surface. The process is called physical vapor deposition. The nitride layer is between 1 and 3 microns thick, and it enhances the hardness of the blade 3 to 8 times over a traditional scissor blank. The enhanced hardness permits a broad range of uses without dulling. For instance, the titanium scissors can be used to cut paper, prepare poultry, and sew without ruining the edge. Tests with 20,000 cuts of paper have shown no dullness. These patented titanium scissors also have the benefit that the blades are extremely smooth. The titanium nitride coatings fill many of the pores, which results in less surface area for particles to adhere. This makes the scissors stick resistant.

GENERAL TERMS OF SALE AND DELIVERY

1) GENERAL

1.0 All our deliveries and the entire present and future legal relationships between ourselves and the purchaser shall be subject to the following conditions. Buying conditions of the purchaser being in whole or in part opposed to our conditions or to the statutory regulations are hereby expressly contradicted. Besides, as far as the contractual relations are concerned, German law shall apply exclusively. The application of the Convention Relating to a Uniform Law on the International Sale of Goods (EKG) and the Uniform Law on the Conclusion of International Sales Agreements (EAG) shall be excluded.

1.1 There exist no verbal side agreements. Agreements diverging from these conditions shall in the individual case only be binding if confirmed by us in writing; in particular, this shall apply to agreements with our representatives, fieldworkers and employees.

1.2 Our offer shall always be made without any engagement. Agreements - also such entered into on fairs or through our travelling salesmen and sales representatives - shall not materialize until our written confirmation of the order and its receipt by the purchaser. Our information stated in the confirmation of the order as to form, colour, size and quantity shall be made to the best of our knowledge, however not binding and without being considered as guaranteed properties. The purchaser shall inform us in writing of any deviations within 14 days after receipt of the confirmation of the order. After the expiration of this period of time the purchaser will not be able to claim false delivery.

2) PRICES

2.0 Our prices are understood for deliveries ex Erlangen. If, after the conclusion of contract, alterations of the calculation bases owing to higher labour- and material costs, increase of the legal value added tax or other circumstances, in particular calculation changes based on technical reasons, should arise we shall be entitled to carry out a corresponding alteration of the prices in an adequate relation to the changed calculation basis. This shall not apply if the purchaser is no merchant in the meaning of the German Commercial Code (HGB) and if our delivery is effected within 4 months after conclusion of contract.

2.1 Packing and forwarding expenses shall be borne by the purchaser, unless otherwise agreed in writing.

3) DELIVERY AND TERMS OF DELIVERY

3.0 Our confirmed terms for delivery are approximate terms and forwarding dates. In case the date of delivery agreed upon should be exceeded by more than 2 weeks, the purchaser shall be entitled to grant us in writing an additional period of time of at least 3 weeks. If the period of grace should not be observed the purchaser shall be entitled to withdraw from the contract by written declaration provided that the purchaser combined its grant of an additional period of time with a threat to withdraw from the contract.

3.1 The delivery of the merchandise shall be effected ex Erlangen. We shall comply with our obligation to deliver by keeping the merchandise ready in the works for their collection or by delivery of the merchandise to the forwarding agent, carrier etc.

3.2 In case the delivery or acceptance of the purchaser should for justifiable reasons not be effected in time we shall be entitled to withdraw from the contract if we have given notice of it - granting an additional period of time - by registered mail or telex 2 weeks before exercising the right to rescind the contract.

3.3 We shall be entitled to make part deliveries.

3.4 Business on fixed terms shall not be made.

3.5 Claims for damages of the purchaser because of delayed deliveries, even for positive violation of contract or tort, shall be excluded unless we had acted at least grossly negligently.

3.6 As far as circumstances not to be justified by us complicate, delay or make impossible the execution of accepted orders we shall be entitled to postpone the delivery, back order or part delivery by the duration of the disturbance or to withdraw in whole or in part from the contract. We shall not be liable e.g. for interferences of the authorities, operational breakdowns, strikes, lock-outs, work breakdowns due to political or economic conditions, lack of necessary raw materials and operating supplies, shortage of material, delays in transit due to traffic disturbances and circumstances beyond our control which occur in our works, those of our sub-contractors or in foreign works which the maintenance of our own works depends upon.

4) FORWARDING AND RISK TAKING

4.0 The forwarding of our merchandise shall be effected ex works at the risk of the purchaser, even in case the freight and other charges are borne by us. The merchandise shall be insured by us against damage to goods in transit and upon express written instruction and to the account of the purchaser.

4.1 Upon delivery of the merchandise to the forwarding agent, carrier etc. the risk shall pass to the purchaser and in case of part deliveries when these are made.

5) TERMS OF PAYMENT

5.0 30 days net, within 14 days 2 % discount. Payment has to be made as shown in our invoice.

5.1 Setting off counterclaims shall not be permitted; this shall not apply to counterclaims not contested by us or declared res judicata against us.

5.2 Payments shall only be considered as effected if we can definitely dispose of the amount. Payments by bills and cheques shall be accepted only on account of performance and upon special agreement. Discount- and bill charges shall at any rate be borne by the purchaser. If payment by bill was agreed, the maturity of the bill shall not exceed 90 days as from the date of the invoice.

5.3 If payment dates agreed upon are not observed by the purchaser we shall charge interest for delay to the amount of 2 % above the respective discount rate of the Deutsche Bundesbank (German Federal Bank) with the reservation of claiming a concrete further damage caused by default.

5.4 Incoming payments shall be used at our discretion for the settlement of the oldest or the least secured liabilities.

5.5 Part deliveries shall be invoiced immediately and shall be due and payable each separately irrespective of the termination of the entire delivery.

6) WITHDRAWAL AND DAMAGES

6.0 If the purchaser is in default with the acceptance of the delivery or a part delivery or if, having been reminded, it does not comply with its payment obligation, we shall be entitled after having granted an adequate grace period to withdraw in whole or in part from the contract or to claim damages because of non-performance to the amount of 20 % of the purchase price, save the assertion of a concrete higher loss, unless the purchaser gives us evidence of a lower loss. The same shall apply if after the conclusion of contract there should arise any clues as to a missing credit worthiness of the purchaser. Clues of this kind are in particular: Default in payment and suspension in payments, petition in bankruptcy or for institution of composition proceedings, transfer of ownership by way of security of current assets, unfavourable information of banks or credit institutions. In lieu of exercising our right to rescind the contract we can also demand securities in form of absolute guarantees or cash before delivery.

7) RESERVATION OF TITLE

7.0 The delivery of our merchandise shall be effected under reservation of title with the following extensions: Until payment in full of any present or future claims against the purchaser resulting from the business relation we shall retain title to all merchandise delivered. This shall also apply to the payment of specially described claims including the settlement of a balance on current account. The merchandise subject to reservation shall be stored properly and insured sufficiently against fire and theft; the corresponding conclusions of insurance contracts shall be submitted by the purchaser upon request.

7.1 The purchaser shall always revocably and as long as it complies with its obligations resulting from the contract towards us be entitled to alienate the merchandise subject to reservation of title in the ordinary course of business as follows: If the purchaser alienates the merchandise delivered by us or if the merchandise is delivered to a third party, irrespective of their value or state, the purchaser does already now assign to us herewith to the amount of the invoice value of our deliveries until the entire repayment of all our claims resulting from these deliveries of merchandise all and any claims against its customer arising from the alienation or delivery with all ancillary rights including the claims for damages resulting for the purchaser from the legal transaction of the resale.

In case of an assignment prohibition with regard to resale and default of payment the purchaser shall be obliged to inform its third party purchaser of the assignment of future claim. If the merchandise subject to reservation delivered by us are alienated together with other merchandise to a third party, the purchaser shall be obliged to separate the invoice items. As far as no separate invoice was made, that part of the asked overhead price shall be assigned to us which corresponds to the invoice value of our delivery.

7.2 The reservation of title with the extensions according to the foregoing dispositions shall even continue to exist if individual claims of the purchaser against its customers should be included in a current account. In this case the purchaser does already now assign to us the balance existing in its favour.

7.3 In case of default of payment of the purchaser we shall be able to fully exercise our creditor's right and shall be entitled to collect the sums due directly from the third party debtor.

7.4 Inadmissible are extraordinary dispositions of the purchaser such as pledge, assignment for security and transfer of ownership of the merchandise subject to reservation.

7.5 The purchaser shall be obliged to notify us immediately if any seizures of third parties on our merchandise and claims such as pledges and any other kind of impairments of our property are to be effected.

7.6 The purchaser shall be entitled to collect the assigned claim itself as long as it complies with its payment obligations existing with us.

7.7 If the value of the entire security provided to us resulting from the business relation should exceed our delivery claim by more than 20 % we shall, upon request of the purchaser, be obliged to return the assigned claims to this extent.

7.8 We shall be entitled at any time to request the return of the merchandise belonging to us. If we make use of this right a withdrawal from the contract within the limits of the Statute Covering Instalment Sales shall only exist if we expressly declare the same in writing.

8) WARRANTY - COMPLAINT

8.0 Only such properties shall be considered guaranteed which were guaranteed by us expressly in writing.

8.1 As for the rest, we shall be liable for defects concerning the delivery excluding any further claims only as follows: The purchaser shall be obliged to examine the merchandise immediately and diligently upon receipt and, if necessary, to realize random samples. Apparent defects irrespective of their kind, and the delivery of an obviously different merchandise than the one ordered or defects shall be claimed immediately i.e. immediately after their receipt and before use of the merchandise, however, within 2 weeks as of receipt of the merchandise at the latest, by registered mail. Even in case of complaint the purchaser shall be obliged to accept the merchandise, to unload and to store it properly. Defects which even in case of thorough examination were not detected at first shall be claimed and made known to us in the same way immediately after their detection. In case of notification of a defect not made in due form and/or in due time the merchandise shall be considered approved among merchants. The same shall apply if the purchaser gives the impression of being a merchant according to law. After expiration of 6 months as of passing of risk any claims of warranty against us shall lapse. We guarantee faultless material as well as professional manufacture of the merchandise delivered by us, do however not assume any liability for inappropriate use or treatment. Deviations customary in the trade and/or due to the manufacturing technique with regard to size, material, colour and design shall not entitle to object to the delivery. To allowable deviations - if any - the DIN standards and our works standards shall apply. In case of a defect which according to the foregoing dispositions we are liable for, the purchaser may at its discretion request a reasonable reduction of the purchase price or delivery of faultless merchandise; faulty substitute delivery shall entitle the purchaser as non-merchant to cancel the purchase too.

8.2 Any further claims, in particular claims for damages of the purchaser against us, our "Erfüllungsgehilfen" (persons employed by the debtor in the performance of his obligation) or vicarious agents for whatever legal reason, in particular for fault in connection with contract negotiations, delay, positive violation of contractual duty and tort, especially claims for compensation of consequential damage such as missed profit etc. shall be excluded, unless they were based on intent or gross negligence.

9) INDUSTRIAL PROPERTY RIGHTS

9.0 The copyrights and industrial property rights, if any, patents, ornamental designs and utility models concerning the models, forms and devices, designs and drawings as well as trademarks registered on our behalf created by us or a third party by our order shall be due to us even if the purchaser should have borne the costs for them.

10) DATA PROCESSING

We shall be entitled to process the data received by the purchaser on the basis of the business relationship according to the dispositions of the German Federal Data Protection Act.

11) ASSIGNMENT PROHIBITION

The assignment of claims against us acquired on the basis of a business transaction shall be excluded.

12) LEGAL CONSEQUENCES IN CASE OF NON-INCORPORATION

In case one or several dispositions of the foregoing terms should become invalid, the validity of the other dispositions and the remaining contract shall not be affected. Invalid dispositions, if any, shall be replaced by new dispositions of the same economic success and object. As far as dispositions have not become integral part of the contract the contents of the contract shall be subject to the legal prescriptions.

13) PLACE OF PERFORMANCE AND PLACE OF JURISDICTION

Place of performance for delivery and payment shall be Erlangen. In all cases even in case of all future claims resulting from the business relation including such resulting from bills, cheques and other documents Erlangen shall be place of jurisdiction, if the purchaser is a merchant or has, according to law, given the impression of being a merchant in the meaning of the German Commercial Code (HGB).
