IDENTIFICATION OF 1956 BUICK OVER-ALL, TWO-TONE AND THREE-TONE COMBINATIONS

The alphabet code letter system [in a series of three (3) letters] will be continued to identify 1956 Model Buick solid, two-tone and three-tone combinations. The first letter designating the upper color, the second the center color and the third the color below the moulding.

For example: AAA denotes over-all Black. ACB denotes upper—Black; center—Dover White; below the moulding—Castle Gray.

NOTE: Buick V-8 Hampden Blue Motor Enamel is not available in the field. Satisfactory over-all refinishing of motor blocks may be accomplished by using a relatively close available Refinish DULUX match to Hampden Blue, such as 93-2908, 93-55911, 93-57287 or 93-71782.

DUCO tinting colors, for the various formulas, are shown where available. These colors are listed in the order of their importance in the event that tinting is necessary.

Color code numbers appear on a plate on the right side portion of the firewall under the hood.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

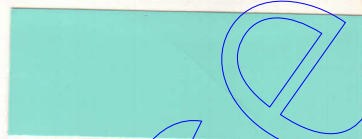

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

IDENTIFICATION OF 1957 BUICK OVER-ALL AND TWO-TONE COMBINATIONS

Alphabet code letters designate colors which are available for solid or two-tone color combinations. The first letter designates the upper color and the second letter designates the color below the sweep spear molding.

Example: Combination AC would be top and center—Black, and below the sweep spear molding—Dover White.

NOTE: Buick V-8 Hampden Blue Motor Enamel is not available in the field. Satisfactory over-all refinishing of motor blocks may be accomplished by using a relatively close available Refinish DULUX match to Hampden Blue, such as 93-2908, 93-55911, 93-57287 or 93-71782.

Color code numbers appear on a plate on the right side portion of the firewall under the hood.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

1958 BUICK COLOR COMBINATIONS

Over-all combinations are so indicated on Sheets 1, 2 and 3 of this Motor Car Service Bulletin.

1958 BUICK TWO-TONE COMBINATIONS

NOTE: *Alphabet Code Letters* designate the colors which are available in DUCO for solid or two-tone color combinations. The first letter designates the color above the belt line *ONLY*, and the second letter designates the color of the body from the belt line down, i. e., (Combination *CA* would be Glacier White above the belt line and Carlsbad Black below the belt line).

Code Numbers designate the colors which are available in LUCITE for solid or two-tone color combinations. The first number designates the color above the belt line *ONLY*, and the second number designates the color of the body from the belt line down, i. e., (Combination *54* would be Polar Mist above the belt line and Silver Mist Metallic below the belt line).

NOTE: Buick V-8 Hampden Blue Motor Enamel is not available in the field. Satisfactory over-all refinishing of motor blocks may be accomplished by using a relatively close available Refinish DULUX match to Hampden Blue, such as 93-2908, 93-55911, 93-57287 or 93-71782.

Color code numbers appear on a plate on the right side portion of the firewall under the hood.

NOTE: The colors in this bulletin are available in DUCO and LUCITE.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and LUCITE color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

†WARNING: DULUX Color Blending formulas or factory-packaged DULUX matching LUCITE Acrylic Lacquer colors are to be used for over-all car painting ONLY. They are not to be used for panel repair or complete refinishing of LUCITE Acrylic Lacquer finished vehicles.

1958 BUICK COLORS

IMPORTANT: PLEASE NOTE

A color chip is shown on Sheet 1 of this bulletin for **Stock No. 2304**, DUCO code and color, **246-59589** Reef Coral.

A late change in the color standard voids **Stock No. 2304** as a refinish match to the Reef Coral used by Buick on 1958 production.

Stock No. 2864 and DUCO code **246-92296** have been assigned and it is to be ordered as the refinish match to the 1958 Buick Reef Coral, Combination No. 58-P.

Kindly cross out all reference to **Stock No. 2304**, DUCO code and color, **246-59589** Reef Coral from this bulletin. **This is IMPORTANT.**

ISSUED AUGUST 29, 1958

1959 BUICK COLOR COMBINATIONS

Over-all combinations are so indicated on Sheets 1 and 2 of this Motor Car Service Bulletin.

1959 BUICK TWO-TONE COMBINATIONS

NOTE: *Alphabet Code Letters* designate the colors which are available in LUCITE Acrylic Lacquer for solid or two-tone combinations.

The first alphabet letter designates the lower color and the second letter designates the upper color. Thus, a car with a Turquoise Metallic lower and a White upper would be coded "KC".

NOTE: Buick V-8 Hampden Blue Motor Enamel is not available in the field. Satisfactory over-all refinishing of motor blocks may be accomplished by using a relatively close available Refinish DULUX match to Hampden Blue, such as 93-2908, 93-55911, 93-57287 or 93-71782.

Color code numbers appear on a plate on the right side portion of the firewall under the hood.

NOTE: The colors in this bulletin are available in DUCO and LUCITE Acrylic Lacquer.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and LUCITE color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.
