ORDER ONLY BY "DUCO" STOCK ORDER NUMBER

DUCO tinting colors, for the various formulas, are shown where available. These colors are listed in the order of their importance in the event that tinting is necessary.

Color combination numbers appear on a plate on the right top portion of the firewall under the hood.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels.

ORDER ONLY BY "DUCO" OR LACQUER STOCK ORDER NUMBER

DUCO tinting colors, for the various formulas, are shown where available. These colors are listed in the order of their importance in the event that tinting is necessary.

Color combination numbers appear on a plate on the right top portion of the firewall under the hood.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

No Formula	Copper	WL-2358

Color combination numbers appear on a plate on the right top portion of the firewall under the hood.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO and LUCITE color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

Color Combination Numbers →

1958 CADILLAC COLOR COMBINATION NUMBERS

The over-all color combinations are so indicated on Sheets 1, 2, 3, 4 and 5 of this bulletin.

NOTE: To aid in the identification of the two-tone color combinations 1958 Cadillac is continuing the system involving four (4) digit numbers (a combination of the numbers of the two involved colors) which will be incorporated into the reference or patent plate under the hood as the combination number. The first two of these digits will identify the lower body color, the last two, the upper body color. An example is: Comb. No. 1012, which would be Black (lower) and Alpine White (upper).

INTERIOR COLORS

DUCO Stock Order Number	Color
2291	†Alpine White
2590-H	†Dakota Red
2594	Olympic White

†Also used as exterior colors.

ISSUED OCTOBER 6, 1958

1959 CADILLAC COLOR COMBINATIONS

The over-all color combinations are so indicated on Sheets 1, 2 and 3 of this bulletin.

NOTE: To aid in the identification of the two-tone color combinations 1959 Cadillac uses a system involving four (4) digit numbers (a combination of the numbers of the two involved colors) which will be incorporated into the reference or patent plate under the hood as the combination number. The first two of these digits will identify the lower body color, the last two, the upper body color. An example is: Comb. No. 1012, which would be Black (lower) and Dover White (upper).

INTERIOR COLORS

NOTE: DUCO mixing machine formulas, only, are available for the following 1959 Cadillac interior colors:

DUCO Formula File Number	Color
LIGHT AND MEDIUM TONES	
91420■	Dusk Pink Metallic
92158-H■	Taos Turquoise Metallic
92384■	Biscay Blue Metallic

93076■	Bengal Brown Metallic
93078-H■	Glencoe Green Metallic
93079■	Beaumont Blue Metallic
93092■	Grampian Gray Metallic

*Also considered as Medium-Dark Tone colors.

■A Du Pont mixing machine formula for DUCO Lacquer is available in quantities of a pint and upwards.

Color combination numbers appear on a plate on the right top portion of the firewall under the hood.

NOTE: The colors in this bulletin are available in DUCO and LUCITE Acrylic Lacquer.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and LUCITE color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.
