1961 CADILLAC COLOR COMBINATIONS

Over-all combinations are so indicated on the Color Chip Sheets of this Bulletin.

NOTE: To aid in the identification of the two-tone combinations a system is used involving four (4) digit numbers, which is a combination of the two (2) involved colors. The first two (2) will identify the lower body color and the last two (2), the upper body color.

Combination numbers are on a plate on the right top portion of the firewall under the hood.

INTERIOR COLORS

DUCO® Stock Number	Color
#44	Black
4066-H■	Paisley Red Metallic

■ A Du Pont mixing machine formula for DUCO Lacquer is not available.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO or LUCITE® Acrylic Lacquer color matches.

Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

ISSUED NOVEMBER 6, 1961

IMPORTANT

As exterior Refinish LUCITE® Acrylic Lacquer formulas are developed, and become available, they will replace the exterior Refinish DUCO® Lacquer colors that were developed as matches to the production colors used in previous years.

1962 CADILLAC COLOR COMBINATIONS

Over-all combinations are so indicated on the Color Chip Sheets of this bulletin.

NOTE: To aid in the identification of the two-tone combinations a system is used involving four (4) digit numbers, which is a combination of the two (2) involved colors. The first two (2) will identify the lower body color and the last two (2), the upper body color.

The first two (2) digits will identify the body color and the second two (2) digits the moulding/insert color on the Cadillac Eldorado Convertible (6367 series).

Combination numbers are on a plate on the top left portion of the firewall under the hood.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO® or LUCITE® Acrylic Lacquer color matches.

Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

NOTES AND EXPLANATION OF SYMBOLS

★Indicates that a DULUX® mixing machine formula is not available.

Consult the mixing machine formula file cabinet for the availability of LUCITE® Acrylic Lacquer formulas.

NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.

NOTE: DULUX is not recommended for the repair of LUCITE or other Acrylic Lacquer finishes.
