ISSUED OCTOBER 15, 1959

1960 CHRYSLER AND IMPERIAL COLOR COMBINATIONS

Over-all color combinations are so indicated on Sheets 1, 2, 3 and 4 of this Bulletin.

A system of codes consisting of two (2) letters and a number will be used to identify the two-tone combinations.

EXAMPLE: ("W" being White and "B" being Black in all instances).

CHRYSLER:

STYLE I WW-1 Solid color, over all.

STYLE II WB-2 First letter } roof and insert color, Windsor and Saratoga only.
 Second letter } roof only, New Yorker only.
 Second letter, basic car color.

IMPERIAL:

STYLE I WW-1 Solid color, over all.

STYLE II WB-2 First letter, insert, or roof and insert, Custom and Crown.
 Second letter, basic car color.

NOTE: Imperial Le Baron comes in solid colors only with stainless steel inserts.

Combination letters and numbers are on the left front portion of the firewall under the hood.

INTERIOR COLORS

| DUCO Stock Number | Color | Part Number |
|----------------------|---|-------------|
| 4099-H■ (Imperial) | †Regal Red | C-7097-B |
| 4124-H■ (Chrysler) | †Cardinal Metallic (Toreador Red Metallic) | C-7087-B |
| 4135■ (Imperial) | †Midnight Blue Metallic | C-2234-B |

†Also exterior colors.

NOTE: DUCO mixing machine formulas, only, are offered for the following interior colors:

| DUCO Formula File Number | CHRYSLER Color | Part Number |
|-----------------------------|----------------------------|-------------|

†Also Imperial.

| DUCO Formula File Number | IMPERIAL Color | Part Number |
|-----------------------------|--------------------------|-------------|
| 83856■ | Nickel Gray | C-5192-B |
| 83862■ | Robinhood Green Metallic | C-3257-B |
| 83863■ | Friar Brown Metallic | C-4108-B |

■A Du Pont mixing machine formula for DUCO Lacquer is, or will be, available in quantities of a pint and upwards.

NOTE: Where semi-gloss is required the addition of #4528 Flattening Compound is recommended in accordance with label directions.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

ISSUED NOVEMBER 4, 1960

1961 CHRYSLER AND IMPERIAL COLOR COMBINATIONS

Over-all color combinations are so indicated on the Color Chip Sheets of this Bulletin.

A single, double or triple letter system is used for identifying the exterior color combinations.

NOTE: Where one or a series of three letters is shown on the identification plate, the car was finished over-all at the factory in the same color. If the letters shown are different, the color identified by the first letter was used as the *Upper*, that of the second letter as the *Middle* or *Lower* color, the third letter (if it is a three-tone combination) the *Lower* color.

Color combination letters appear on the front portion of the firewall under the hood.

| 4187 | †Russet Metallic | 8570-B, SB | Imperial |

†Also exterior colors.

NOTE: DUCO mixing machine formulas are offered for the following interior colors:

| DUCO Formula File Number | Color | "C" Part Number | Car |
|-----------------------------|-----------------------|--------------------|---------------------|
| 83816 | Black Frost Metallic | 5189-B, SB | Chrysler |
| 94960 | Forest Green Metallic | 3266-B, SB | Chrysler & Imperial |
| 94961 | Bark Brown Metallic | 4110-B, SB | Chrysler |
| 94963 | Bronze Metallic | 8570-B, SB | Imperial |

NOTE: SB indicates semi-gloss. Where semi-gloss is required, the addition of #4528 Flattening Compound is recommended in accordance with label directions.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX® color matches; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

IMPORTANT—See Reverse Side →

IMPORTANT

Refinish DUCO® Lacquer Colors shown in this bulletin will be replaced with LUCITE® Acrylic Lacquer Colors using the same Stock Number with appropriate suffix as soon as they are developed and become available.

1962 CHRYSLER CORPORATION COLOR COMBINATIONS

Overall combinations are so indicated on the Color Chip Sheets of this bulletin.

Chrysler and Imperial color combination letters are on a body code plate on the left front pillar post or the right top corner of the radiator yoke.

Dodge, Dart, Lancer, Plymouth and Valiant color combination letters appear on the body code plate which may be found in one of the following locations: Right or left front fender side shields—right or left side of cowl panel or the left side of the radiator yoke side panel cross member.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate LUCITE® Acrylic Lacquer, DUCO® or DULUX® color matches; however, it should be noted that it is not always possible to make close matches in LUCITE Acrylic Lacquer or DUCO to DULUX colors and vice versa.

Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

1962 DODGE TRUCK COLORS

The following colors are repeated from previous production:

| DULUX® CODE | Color | "C" Part No. |
|-------------|----------------------------|-----------------|
| 93-005 | Angus Black | 1003-E |
| 93-546 | Bell System Green | 3203-E |
| 93-72213 | Pine Green | 3112-E |
| 93-72397-H | Dodge Truck Red (Bleeder) | 7021-E |
| 93-75043-H | Omaha Orange | 7060-E |
| 93-75306 | National School Bus Chrome | 9167-E |
| 93-75757 | Arctic Blue | 2191-E |
| 93-75758 | Marlin Blue | 2192-E |

NOTES AND EXPLANATION OF SYMBOLS

†These are the 1963 SPECIAL SUEDE INTERIOR COLORS. ■Available in factory package only.
 ★Indicates a DULUX mixing machine formula is not available. *DULUX mixing machine formula only.
 (a) Also used as accent colors on the 1963 Oldsmobile "98".
 Consult the mixing machine formula file cabinet for the availability of LUCITE Acrylic Lacquer formulas.
NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.
NOTE: DULUX is not recommended for the repair of LUCITE or other Acrylic Lacquer finishes.
NOTE: Where semi-gloss is required, the addition of #4528 Flattening Compound is recommended in accordance with label directions.

www.backman.se

1965 CHRYSLER CORPORATION COLOR IDENTIFICATION

CHRYSLER, DODGE, IMPERIAL AND PLYMOUTH

TWO-TONE COMBINATIONS

The first letter or number of a two symbol paint code identifies the roof or accent color. The second letter or number identifies the body color. (For example, the combination WC on a Chrysler would indicate the roof or accent area is in Persian White and the body is finished in Ice Blue.)

LOCATION OF PAINT CODE PLATE

Chrysler paint code plates are located on the cowl top panel left side under hood.

Dodge paint code plates are located on left front fender side shield or wheel housing.

Plymouth paint code plates are in one of the following locations: right or left front fender side shields; right or left side of the cowl panel; left side of the radiator side panel member.

Imperial paint code plates are located on the upper left side of the firewall under the hood or on the left front body pillar post.

LUCITE® Acrylic Lacquer or DULUX® Enamel is recommended for panel repair and overall refinishing of baked or aged air-dry enamels (over properly sanded and sealed surfaces). DUCO® Lacquer is recommended for spot repair of these enamels when desired.

NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.

1966 CHRYSLER CORPORATION COLOR IDENTIFICATION

CHRYSLER, DODGE, IMPERIAL AND PLYMOUTH

TWO-TONE COMBINATIONS

The first letter or number of a two symbol paint code identifies the roof or accent color. The second letter or number identifies the body color. (For example, the combination WC on a Chrysler would indicate the roof or accent area is in Persian White and the body is finished in Powder Blue.)

LOCATION OF PAINT CODE PLATE

Chrysler paint code plates are located on the cowl top panel left side under hood.

Dodge paint code plates are located on left front fender side shield or wheel housing.

Plymouth paint code plates are in one of the following locations: right or left front fender side shields; right or left side of the cowl panel; left side of the radiator side panel member.

Imperial paint code plates are located on the upper left side of the firewall under the hood or on the left front body pillar post.

1968 CHRYSLER CORPORATION COLOR IDENTIFICATION

CHRYSLER, DODGE, IMPERIAL AND PLYMOUTH

TWO-TONE COMBINATIONS

The first letter or number of a two symbol paint code identifies the roof or accent color. The second letter or number identifies the body color. (For example, the combination WC on a Chrysler would indicate the roof or accent area is in Polar White and the body is finished in Consort Blue.)

LOCATION OF PAINT CODE PLATE

Chrysler paint code plates are located on the cowl top panel left side under hood.

Dodge paint code plates are located on left front fender side shield or wheel housing.

Imperial paint code plates are located on the upper left side of the firewall under the hood or on the left front body pillar post.

Plymouth paint code plates are in one of the following locations: right or left front fender side shields; right or left side of the cowl panel; left side of the radiator side panel member.

LUCITE® Acrylic Lacquer is recommended for SPOT REPAIR, panel repair and overall refinishing of all original automotive finishes. Dulux® Enamel may also be used for panel repair and overall refinishing.

NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.

1969 CHRYSLER CORPORATION COLOR IDENTIFICATION

CHRYSLER, DODGE, IMPERIAL AND PLYMOUTH

TWO-TONE COMBINATIONS

The first Paint Code identifies the roof or accent color. The second Paint Code identifies the body color. (For example, the combination W1-B3 on a Chrysler would indicate the roof or accent area is in Spinnaker White and the body is finished in Bahama Blue.)

LOCATION OF PAINT CODE PLATE

Chrysler paint code plates are located on the cowl top panel left side under hood.

Dodge paint code plates are located on left front fender side shield or wheel housing.

Imperial paint code plates are located on the upper left side of the firewall under the hood or on the left front body pillar post.

Plymouth paint code plates are in one of the following locations: right or left front fender side shields; right or left side of the cowl panel; left side of the radiator side panel member.

LUCITE® Acrylic Lacquer is recommended for SPOT REPAIR, panel repair and overall refinishing of all original automotive finishes. Dulux® Enamel may also be used for panel repair and overall refinishing.

NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.
