Dark Brown Metallic

Part Number  
M-21J-723D  
Series ABCD

NOTE: AB—Edsel Ranger and Pacer series cars produced in Ford Plants.  
CD—Edsel Corsair and Citation series cars produced in Mercury Plants.

**1958 Edsel Color Code Numbers**

Overall combinations are listed under "Code and Part Number."

1958 Edsel two-tone combinations are not available but are identified on the cars by their respective letter symbols. The first letter being the Upper color, the second the Lower color.

Color code letters appear on the Patent Plate which is affixed to the left front door hinge pillar post.

NOTE: The colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.
