ISSUED DECEMBER 9, 1959

See Reverse Side for an Explanation of the 1960 Edsel Color Combinations→

1960 Edsel Color Combinations

Over-all combinations are so indicated on Sheets 1 and 2 of this Bulletin.

Two-tone combinations are not available but are identified on the cars by their respective letter symbols. The first letter being the Upper color, the second the Lower color.

Color code letters appear on the Patent Plate which is affixed to the left front door hinge pillar post.

NOTE: The colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinishing trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

INTERIOR COLORS

NOTE: DUCO mixing machine formulas, only, are offered for the following interior colors:

DUCO Formula File Number	Color	M-21J Part Number
