\*A color chip for 246-55134 Meadow Green will be found on Sheet 1 of the 1952 Ford Color Bulletin No. 21.

†Also used as 1955 Ford passenger car exterior colors. Color chips will be found on Sheets 1 and 2 of this bulletin.

★A Du Pont mixing machine formula for DULUX Enamel is available.

DUCO tinting colors, for the various formulas, are shown where available. These colors are listed in the order of their importance in the event that tinting is necessary.

Color code letters appear on the left front body pillar extension.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels.

**1956 FORD COLOR CODE NUMBERS**

Over-all combinations are listed under the caption "Code and Part Number."  
 1956 Ford two-tone combinations are not available but are identified on the cars by their respective color letter symbols. The first letter being the Upper color, the second being the Lower color.  
 DUCO tinting colors, for the various formulas, are shown where available. These colors are listed in the order of their importance in the event that tinting is necessary.  
 Color code letters appear on the left front body pillar extension.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.  
 Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.  
 As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

**INTERIOR COLORS**

NOTE: DUCO mixing machine formulas only are available for the following 1957 Ford interior colors:

DUCO Formula File Number	Color	Part Number
90934	Brown Metallic	M-21J-723D
90935	Green Metallic	M-21J-724D
90936	Blue Metallic	M-21J-725D
90937	Gray Metallic	M-21J-726D

The above interior colors have subdued gloss and will require the addition of 4528 Flattening Compound.

**1957 FORD COLOR CODE NUMBERS**

Over-all combinations are listed under the caption "Code and Part Number."

1957 Ford two-tone combinations are not available but are identified on the cars by their respective color letter symbols. The first letter being the Upper color, the second being the Lower color.

Color code letters appear on the left front body pillar extension.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

See Reverse Side for Explanation of the 1958 Ford Color Codes.→

## 1958 FORD COLOR CODE NUMBERS

Over-all combinations are listed under the caption "Code and Part Number."

1958 Ford two-tone combinations are not available but are identified on the cars by their respective color letter symbols. The first letter being the Upper color, the second being the Lower color.

Color code letters appear on the left front body pillar extension.

NOTE: The colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.
