

1960 CHEVROLET COLOR COMBINATIONS

The letter symbol "A" identifies over-all colors and they are so indicated on Sheets 1 and 2 of this Bulletin.

TWO-TONE combinations of the RPO-B, C and D series cars are as follows:

Series:	U (upper areas)	L (lower areas)
B (11-1200 except 11-1270-1300-1400)	Roof—Only	Lower Body
C (17-1800 except 17-1867)	Roof and Side Moulding Insert Area	Lower Body
D (15-1600)	Roof and Back Panel Cove Area	Lower Body except Back Panel Cove Area

The proper series identifying letter symbol appears on the car as a suffix immediately following the RPO Combination Number.

Color Combination Numbers are on a plate on the right side of the dash panel, under the hood, immediately below the heater water control valve (Ranco Valve).

IMPORTANT

1960 CHEVROLET PASSENGER CARS FRONT AND REAR VALANCES AND GRAVEL GUARDS

The following parts are finished and assembled in production in baked enamel colors matching the shade of the LUCITE Acrylic Lacquer on the surrounding body areas:

1. Body rear outer valance, right and left hand.
2. Front bumper face bar valance assembly, right and left hand.
3. Gravel deflectors and wheels.

It is *imperative* that Du Pont Refinish DUCO be used for any service touch-up and repair of these particular parts in the field. LUCITE Acrylic Lacquer body colors *cannot* be used for this purpose.

It is also *imperative* that neither the DUCO factory-packaged material nor the DUCO mixing machine formula material be used for any service touch-up or repair of the LUCITE Acrylic Lacquer on the surrounding body areas.

Following are the DUCO colors that are recommended:

DUCO Stock Number	Color	RPO Combination Number
2967-H	Roman Red	923-A, 973 (L)

NOTE: DUCO mixing machine formulas, only, are offered for the following:

DUCO Formula File Number	Color	RPO Combination Number
93988■	Sateen Silver Metallic	940-A, 984 (L)
93989■	Shadow Gray Metallic	941-A, 988 (L)
93991■	Suntan Copper Metallic	920-A, 970 (L)
93992■	Fawn Beige	938-A
93993■	Crocus Cream	925-A
93994■	Jade Green Metallic	905-A, 955 (L)

■A Du Pont mixing machine formula for DUCO Lacquer is, or will be, available in quantities of a pint and upwards.

The 1960 Chevrolet exterior colors, appearing on Sheets 1 and 2 of this Bulletin, are available in LUCITE Acrylic Lacquer and DULUX.

The 1960 Corvaire and Corvette exterior colors, appearing on Sheet 3 of this Bulletin, are available in LUCITE Acrylic Lacquer.

The 1960 Chevrolet Passenger Car Front and Rear Valance and Gravel Guard colors, listed on the reverse side of Sheet 1 of this Bulletin, are available in DUCO factory-packaged or DUCO mixing machine formula material.

The 1960 Chevrolet Truck exterior colors, appearing on Sheets 4 and 5 of this Bulletin, are available in DUCO and DULUX.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO, LUCITE Acrylic Lacquer and DULUX color matches; however, it should be noted that it is not always possible to make close matches in DUCO or LUCITE Acrylic Lacquer to DULUX and vice versa. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

NOTE: DUCO mixing machine formulas, only, are offered for the following interior colors:

DUCO Formula File Number	Color
73605■	Charcoal
94162■	Silver Metallic

- A Du Pont mixing machine formula for DUCO Lacquer is, or will be, available in quantities of a pint and upwards.

NOTE: Where semi-gloss is required the addition of #4528 Flattening Compound is recommended in accordance with label directions.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX and vice versa. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

NOTE: RPO combination letter designations are:

A—Over-all (solid color).

TWO-TONE COMBINATIONS

- B—1405-3605 Models.
- C—1406-1416 Models.
- D—All Cabs, except Fleetside.
- J—Fleetside.

Wheels on all C-14-15-25-36 series TWO-TONE models are the body basic color. All other wheels are Black.

All series depressed area on hood filler panel, radiator grilles, grille areas on front fenders and grille baffle, bumpers and headlamp bezels are Bombay White except Pure White on white jobs.

Air scoop areas on front fenders and grille baffle on all series are Flat Black (Refinish DULUX #44 Black or DUCO 246-92 Black with #4528 Flattening Compound added for emergency repair).

The "Chevrolet" name on all series is Black.

Color Combination Numbers are on a plate on the right side of the dash panel, under the hood, immediately below the heater water control valve (Ranco Valve).

IMPORTANT

1961 CHEVROLET PASSENGER CARS FRONT AND REAR VALANCES AND GRAVEL GUARDS

The following parts are finished and assembled in production in baked enamel colors matching the shade of the LUCITE Acrylic Lacquer on the surrounding body areas:

1. Body rear outer valance, right and left hand.
2. Front bumper face bar valance assembly, right and left hand.
3. Gravel deflectors and wheels.

It is *imperative* that Du Pont Refinish DUCO® be used for any service touch-up and repair of these particular parts in the field. LUCITE Acrylic Lacquer body colors *cannot* be used for this purpose.

It is also *imperative* that neither the DUCO factory-packaged material nor the DUCO mixing machine formula material be used for any service touch-up or repair of the LUCITE Acrylic Lacquer on the surrounding body areas.

Following are the DUCO colors that are recommended:

DUCO Stock Number	Color	RPO Combination Number
#44	Tuxedo Black	900, 950 (L)
2967-H■	Roman Red	923, 973 (L)
4066-H■	Honduras Maroon Metallic	948

NOTE: DUCO mixing machine formulas, only, are offered for the following:

DUCO Formula File Number	Color	RPO Combination Number
93110	Almond Beige	938
93988	Sateen Silver Metallic	940, 984 (L)

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO, LUCITE® Acrylic Lacquer and DULUX® color matches; however, it should be noted that it is not always possible to make close matches in DUCO or LUCITE Acrylic Lacquer to DULUX and vice versa.

Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

★A Du Pont mixing machine formula for DULUX Enamel is not available.

■A Du Pont mixing machine formula for DUCO Lacquer is not available.

††Also exterior colors.

ORDER BY DUCO STOCK NUMBER

NOTE: Where semi-gloss is required the addition of #4528 Flattening Compound is recommended in accordance with label directions.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX and vice versa.

Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

NOTE: RPO combination letter designations are:

A—Over-all (solid color).

TWO-TONE COMBINATIONS

B—C-1405, K-1405, C-3605 Models.

C—C-1406-16, K-1406-16 Models.

D—All Cabs (except Fleetside).

E—R-1205 Panel.

F—R-1206 Suburban.

G—R-1244-54 Pickup.

J—Fleetside.

L—Tilt Cab.

Wheels on all C-14-15-25-36 series Two-Tone models are the body basic color. All other wheels are Black. All series depressed area on hood filler panel, radiator grilles, grille areas on front fenders and grille baffle, bumpers and headlamp bezels are Cameo White except Pure White on white jobs.

Air scoop areas on front fenders and grille baffle on all series are Flat Black (Refinish DULUX #44 Black or DUCO 246-92 Black with #4528 Flattening Compound added for emergency repair).

The "Chevrolet" name on all series is Black.

ISSUED SEPTEMBER 20, 1961

IMPORTANT

As exterior Refinish LUCITE® Acrylic Lacquer formulas are developed, and become available, they will replace the exterior Refinish DUCO® Lacquer colors that were developed as matches to the production colors used in previous years.

1962 COLOR COMBINATIONS

Overall combinations are so indicated on the Color Chip Sheets of this bulletin.

Alphabet letters and RPO numbers designate the two-tone combinations.

Corvette—not shown on the car.

Corvaire—on a plate on the left rear wheel housing.

Chevrolet—on a plate on the left side of the dash panel under the hood near the windshield washer device.

Buick*—Oldsmobile*—Pontiac*(*All Models) on a plate on the top left portion of the firewall under the hood.

1962 CHEVROLET—CORVAIR TWO-TONE COMBINATIONS

LUCITE® Stock Number	Color	Combination Number	LUCITE® Stock Number	Color	Combination Number
#88-L	Tuxedo Black	950 (L)	4251-LH	Nassau Blue Metallic	962 (L)
2931-LH	Roman Red	973 (L)	4252-L	Twilight Turquoise	965 (U)
4024-L	Ermine White	950 (U), 953 (U)	4253-L	Twilight Blue Metallic	963 (L), 965 (L)
		959 (U), 963 (U)	4254-L	Surf Green	953 (L), 955 (U)
		973 (U), 984 (U)	4255-L	Laurel Green Metallic	955 (L)
4247-L	Satin Silver Metallic	984 (L)	4256-L	Adobe Beige	970 (U)
4250-L	Silver Blue Metallic	959 (L), 962 (U)	4257-L	Autumn Gold Metallic	970 (L)

NOTE: Valance Colors are not used on the 1962 Chevrolet.

1962 OLDSMOBILE COMBINATIONS

1. *Lower Body Color Letter*—Hood, front fenders, body below the belt line and deck lid.
2. *Accent Color Letter* (3600 series only)—Area between the two body side mouldings.
3. *Upper Body Color Letter*—Roof panel only.
4. *Wheel Color Letter*—Wheel.
5. *Disc Color Letter*—When deluxe discs are specified, the disc color letter is used in place of the wheel color letter.

EXAMPLE A car, finished overall with Sheffield Mist Metallic (D) with Garnet Mist Metallic (L) wheels, will be identified as—DDL. The same car in the Starfire series, having a Provincial White (C) accent, will be identified as—DCDL.

A car, two-toned with Provincial White (C) on the Lower Body and Sheffield Mist Metallic (D) on the Upper Body with Garnet Mist Metallic (L) wheels, will be identified as—CDL. The same car in the Starfire series having a Garnet Mist Metallic (L) accent, will be identified as—CLDL.

NOTE: Two-Tone combinations will not be available on the 98 Town Sedan (3819), 98 Holiday Sedan (3829) or any convertible (3267, 3567, 3667 and 3867).

MOTOR ENAMELS

Satisfactory overall refinishing of motor blocks may be accomplished by using relatively close available DULUX® Mixing Machine formula matches which follow:

DULUX® Formula File No.	Color	Buick and Special	Oldsmobile and F-85	Pontiac and Tempest	Chevrolet	Corvaire	Corvette
6924-H	Red				X	X	X
23943	Dark Green		X				
58785-H	Red		X				
73108	Hampton Blue	X					
73119	Blue				X	X	X
73124	Dark Green			X			
76981	Blue			X			
83647	Gold Metallic		X				

NOTE: Every possible precaution is taken to provide the refinish trade with accurate LUCITE® Acrylic Lacquer, DUCO® or DULUX® color matches; however, it should be noted that it is not always possible to make close matches in LUCITE Acrylic Lacquer or DUCO to DULUX and vice versa.

Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

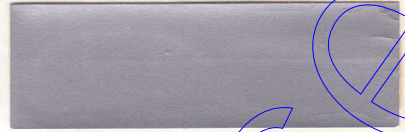

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

††Used only on the LDFC Greenbrier.

INTERIOR COLORS

NOTE: DUCO Mixing Machine formulas, only, are available for the following:

DUCO Stock Number	Color	DUCO Formula File Number	Color
2411-H	Cardinal Red	(4317)	Turquoise Metallic
4195	Cameo White	17559	Charcoal Gray Metallic
4228■	*Charcoal Gray Metallic	17617	Fawn Metallic
		77891	Light Green
		94162	*Silver Metallic

■A Du Pont mixing machine formula for DUCO Lacquer is not available.

*Used only on Tilt Cab Trucks.

ORDER BY LUCITE® OR DUCO® STOCK NUMBER

NOTE: Where semi-gloss is required the addition of #4528 Flattening Compound is recommended in accordance with label directions.

NOTE: Every possible precaution is taken to provide the refinish trade with accurate LUCITE® Acrylic Lacquer, DUCO® or DULUX® color matches; however, it should be noted that it is not always possible to make close matches in LUCITE Acrylic Lacquer or DUCO to DULUX and vice versa.

Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

Wheels, on two-tone models, are the basic body color. All other wheels are Black.

Bumpers, radiator grilles, grille areas on front fenders and radiator grille baffles, headlamps, parking lamp bezels and the moulding insert area on custom Fleetside Models are Cameo White.

Bumpers on Pure White LDFC Models, only, are Pure White.

Air scoop areas on front fenders and radiator grille baffles are Flat Black. (Use 246-92 DUCO® Dull Black or #44 DUCO Black with #4528 Flattening Compound added for emergency repair.)

The CHEVROLET name is Black.

IMPORTANT

As exterior Refinish LUCITE® Acrylic Lacquer formulas are developed, and become available, they will replace the exterior Refinish DUCO® Lacquer colors that were developed as matches to the production colors used in previous years.

NOTES AND EXPLANATION OF SYMBOLS

+These are the 1963 SPECIAL SUEDE INTERIOR COLORS. ■Available in factory package only.
 ★Indicates a DULUX mixing machine formula is not available. *DULUX mixing machine formula only.
 (a) Also used as accent colors on the 1963 Oldsmobile "98".
 Consult the mixing machine formula file cabinet for the availability of LUCITE Acrylic Lacquer formulas.
 NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.
 NOTE: DULUX is not recommended for the repair of LUCITE or other Acrylic Lacquer finishes.
 NOTE: Where semi-gloss is required, the addition of #4528 Flattening Compound is recommended in accordance with label directions.

BUICK AND PONTIAC

The first letter of a two-letter paint code identifies the main body color. The second letter identifies the roof color. (For example, the combination FW on a Pontiac, would indicate the lower main body finished in 4250-L Yorktown Blue Metallic and the roof area in 4395-L Nocturne Blue Metallic.)

OLDSMOBILE

The first letter identifies the main body color and the second letter identifies the roof color as with Buick and Pontiac. The third letter, where used, identifies the wheel color.

ACCENT (PINSTRIPE) COLORS

	LUCITE®		LUCITE®
Ebony Black	88	Wedgewood Mist	4455-L
Chariot Red	2931-LH	Cashmere Beige	4526-L
Provincial White	4024-L	Jade Mist	4581-L
Sheffield Mist	4453-L	Aqua Mist	4582-L

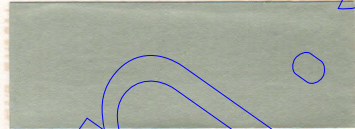

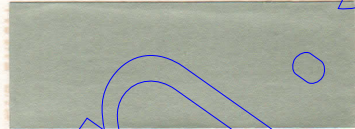

CADILLAC

The first two numbers identify the main body color and the last two numbers identify the roof color.

General Motors paint code plate for all models except Corvair and Corvette is located under the hood at the top of the firewall on left or right of upper shroud. Corvair paint code plate is on the left rear wheel housing. Corvette paint code plate is under the dash, below the glove compartment.

NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards. LUX® is not recommended for the repair of LUCITE® or other Acrylic Lacquer finishes.

1966 GENERAL MOTORS CORPORATION COLOR IDENTIFICATION

TWO-TONE COMBINATIONS
CHEVROLET, BUICK AND PONTIAC
The first letter of a two-letter paint code identifies the body color. The second letter identifies the roof color. (For example, the combination VC on a Pontiac would indicate the body finished in Mission Beige and the roof area in Cameo Ivory.)
OLDSMOBILE
The first letter identifies the body color and the second letter identifies the roof color. The third letter, when used, identifies the wheel color.
CADILLAC
The first two numbers identify the body color and the last two numbers identify the roof color.

LOCATION OF PAINT CODE PLATE
General Motors paint code plate for all models except Corvair and Corvette is located under the hood at the top of the firewall on left or right of upper shroud. Corvair paint code plate is on the left cross-rail in engine compartment. Corvette paint code plate is on instrument panel brace, below the glove compartment.

DULUX® is not recommended for the repair of LUCITE® or other Acrylic Lacquer finishes.

NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.

1967 GENERAL MOTORS CORPORATION COLOR IDENTIFICATION

TWO-TONE COMBINATIONS
CHEVROLET, BUICK AND PONTIAC
The first letter of a two-letter paint code identifies the body color. The second letter identifies the roof color. (For example, the combination EC on a Pontiac would indicate the body finished in Fathom Blue Metallic and the roof area in Cameo Ivory.)
OLDSMOBILE
The first letter identifies the body color and the second letter identifies the roof color. The third letter, when used, identifies the wheel color.
CADILLAC
The first two numbers identify the body color and the last two numbers identify the roof color.

LOCATION OF PAINT CODE PLATE
General Motors paint code plate for all models except Corvair and Corvette is located under the hood at the top of the firewall on left or right of upper shroud. Corvair paint code plate is on the left cross-rail in engine compartment. Corvette paint code plate is on instrument panel brace, below the glove compartment.

DULUX® is not recommended for the repair of LUCITE® or other Acrylic Lacquer finishes.

WWW.PACKMAN.SE

1968 GENERAL MOTORS CORPORATION COLOR IDENTIFICATION

TWO-TONE COMBINATIONS
CHEVROLET, BUICK AND PONTIAC
The first letter of a two-letter paint code identifies the body color. The second letter identifies the roof color. (For example, the combination EC on a Pontiac would indicate the body finished in Aegena Blue Metallic and the roof area in Cameo Ivory.)
OLDSMOBILE
The first letter identifies the body color and the second letter identifies the roof color. The third letter, when used, identifies the wheel color.
CADILLAC
The first two numbers identify the body color and the last two numbers identify the roof color.

LOCATION OF PAINT CODE PLATE
General Motors paint code plate for all models except Corvair and Corvette is located under the hood at the top of the firewall on left or right of upper shroud. Corvair paint code plate is on the left cross-rail in engine compartment. Corvette paint code plate is on instrument panel brace, below the glove compartment.

DULUX® is not recommended for the repair of LUCITE® or other Acrylic Lacquer finishes.

NOTE: It may be necessary, at times, to tint colors to produce a satisfactory match due to normal weathering and changes in color standards.
