†Also used as exterior body colors.

DUCO tinting colors, for the various formulas, are shown where available. These colors are listed in the order of their importance in the event that tinting is necessary.

Color combination numbers appear directly below the patent plate on the firewall panel to the left of the windshield wiper motor under the hood.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Services depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

**INTERIOR COLORS**

NOTE: DUCO mixing machine formulas only are available for the following 1957 Lincoln interior colors:

DUCO Formula File Number	Color	Part Number
91130	Dark Brown Metallic	M-25J-740
91131	Light Brown Metallic	M-25J-741

All 1957 Lincoln exterior colors have some usage as interior colors.

Color combination numbers appear directly below the patent plate on the firewall panel to the left of the windshield wiper motor under the hood.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

Color combination numbers appear directly below the patent plate on the firewall panel to the left of the windshield wiper motor under the hood.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.

ISSUED NOVEMBER 25, 1958

## 1959 LINCOLN-CONTINENTAL COLOR COMBINATIONS

Over-all combinations are listed under the caption "Combination and Part Number."

1959 Lincoln-Continental two-tone combinations are not available but are identified by their respective color combination numbers. The first number being the Upper Color, the second the Lower Color.

Color combination numbers appear directly below the patent plate on the firewall panel to the left of the windshield wiper motor under the hood.

### INTERIOR COLORS

NOTE: DUCO mixing machine formulas, only, are available for the following 1959 Lincoln-Continental interior colors.

DUCO Formula File Number	Color	Part Number
83489-H■	Dark Gray Metallic	M-4J-1100
83490-H■	Dark Blue Metallic	M-4J-1101
83491-H■	Dark Green Metallic	M-4J-1102
83492▲	Dark Gold Metallic	M-4J-1103

■A Du Pont mixing machine formula for DUCO Lacquer is, or will be, available in quantities of a pint and upwards.

▲A Du Pont mixing machine formula for DUCO Lacquer is, or will be, available in quantities larger than a pint.

NOTE: Where semi-gloss is required, addition of #4528 Flattening Compound is recommended in accordance with label instructions.

Color combination numbers appear directly below the patent plate on the firewall panel to the left of the windshield wiper motor under the hood.

NOTE: Most colors in this bulletin are available in both DUCO and DULUX; however, it should be noted that it is not always possible to make close matches in DUCO to DULUX colors and vice versa.

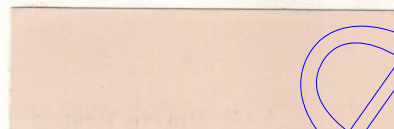

Every possible precaution is taken to provide the refinish trade with accurate DUCO and DULUX color matches. Due to circumstances beyond our control, we cannot be responsible for inaccurate color matches resulting from changes in standards by automobile manufacturers without our knowledge, change of car colors on aging, and color variances caused by application methods, etc. We will assume responsibility only for factory color matches to established Du Pont color standards.

As the accuracy of color matches made with the Du Pont Color Blending Service depends on the individual operating the equipment, we will assume responsibility only for the uniformity of our mixing enamels and lacquers.
