The Mosaic of the third millennium

Since October 2008, the Pepe & Con Srl, with the futuristic Mosaico Digitale project ®, has brought to the fore the ancient art of mosaic, revolutionizing the creative perspectives. This unique product has been designed and produced in Italy with the latest technology to deconstruct any digital image and print it onto resin film tiles. Mosaico Digitale's most impressive feature is that almost all aspects of the tile are completely customizable; from features image and shape to texture and install surface. Mosaico Digitale's most impressive feature is that almost all aspects of the tile are completely customizable.

Mosaico Digitale's innovative system takes advantage of modern printing technology to customize and construct tiles digitally – printing entire images and setting them behind a resin which forms a tile. Any photo or graphic image of your choosing may be transferred onto the resin tiles, even the

shape of the tiles themselves can be changed to fit any project you have in mind. The install process is also intelligently simple; Each tile square is numbered individually during production, allowing the tiles to be laid out in numerical order to form the whole image in preparation for tiling. The flexible nature of the tile sheets allows them to be applied to irregular surfaces including curved or round objects as well as be trimmed to fit into unusual wall or floor spaces. For the first time digital images can be tiled across anything from floor spaces and swimming pools to furniture and feature walls. Thanks to these particular characteristics, over the years, Mosaico Digitale ® has received acclaim around the world so as to provide reality as Eataly, Versace, Costa Group, Metropolitan Chicago, MacDonalds, and collaborate with renowned architects and designers such as Mac Stopa, Karim and Sandro Santantonio Rashid. Mosaico Digitale ®: the only limit is your creativity!

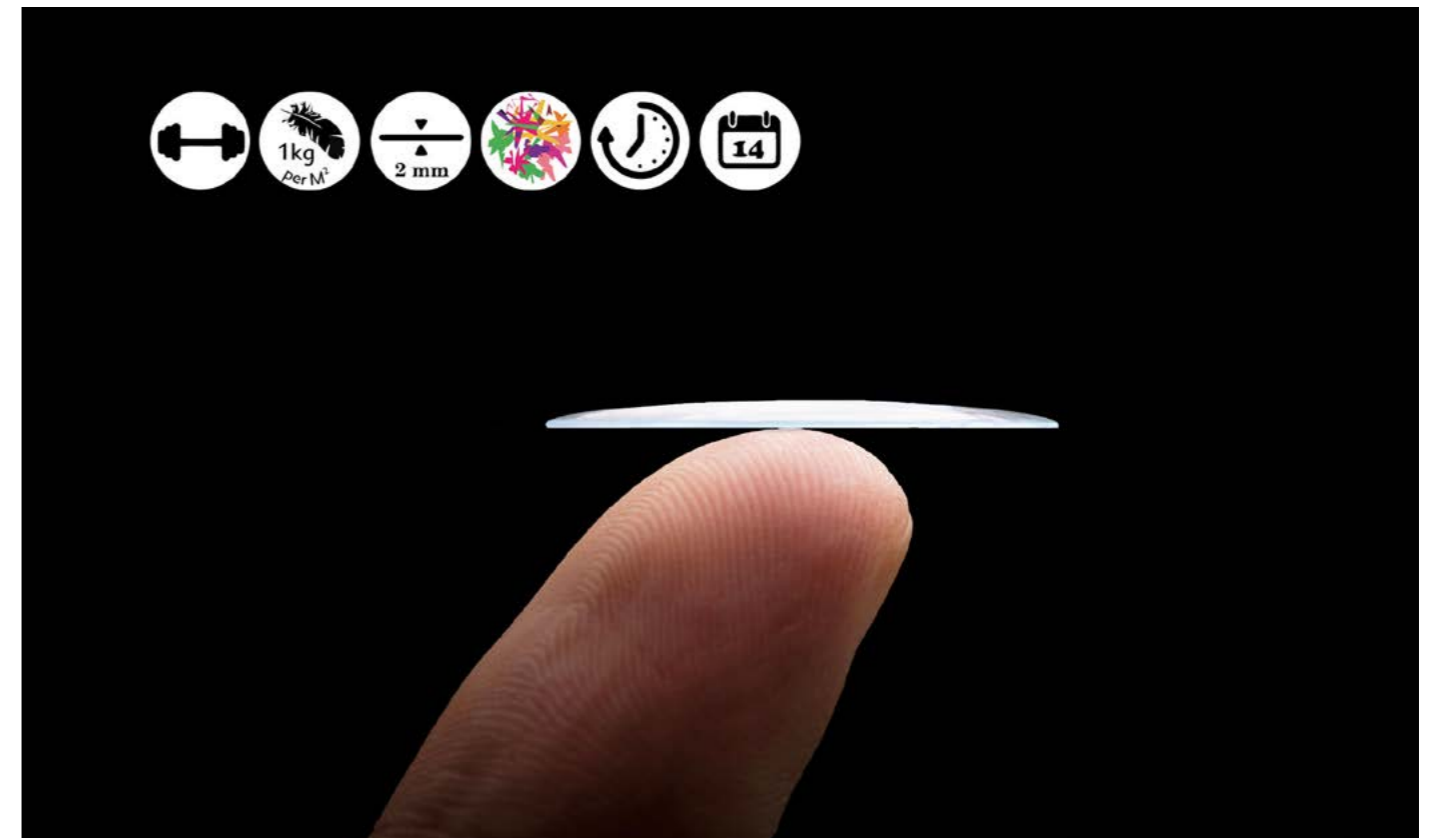

Lightweight, Durable, Universal

The single tile consist of **a layer of resin 2mm thin** (0,07 inch). Digital printing is incorporated inside the resin itself, which is why atmospheric agent such as UV Rays, rain, wear contacts, trampling, thought not in time the integrity of **product that is extremely durable over that versatile.**

Maximum security, maximum performance for a **weight of only 1,2 Kg for square meter**, (0.24 lb/sf) means 11 square feet little over 2 pounds.

Mosaico Digitale is **suitable to any surface** (flat,curved,angular) and for this can be used even where the traditional mosaic could not be installed. The material is **certified not-toxic** is approved by The HEALTH AUTHORITY and is therefore suitable for food environments.

Finally,In order of importance, Mosaico Digitale is **delivered in 2 weeks** and anyone can do the installation yourself,given the simplicity of this operation.

Metallic

Gold, Silver, Bronze, Copper

The design center within the company is the beating heart of Mosaico Digitale, which offers ideas aimed at concrete world of design. In 2015, thanks to the past experiences and a detailed study of materials, shapes and colors, the design center has finally defined the 2015 collection of metal, a classic collection as modern, that gives value to any surface. The four gold trim, silver, bronze and copper fanning out into a world of infinite solutions through the plot with the different types of anchors, from the classic square in unique shapes and irregular. The final mix is shimmering elegance.

My Life on the Wall

All your pictures into one mosaic

"My Life on the Wall" is the technique invented by Mosaico Digitale which aims to give to any person, a unique and personal wall depicting his life. Mosaico Digitale is able to process a unique work composed of 10 - 100 - 1000 shots photographs that become pieces of a larger mosaic. Moreover, thanks to a special software, with "My Life on the Wall" is possible to realize an image at two levels, one of background depicting a unique image visible from a distance, and the secondary level of the blocks each of which consists of a different image, only visible up close. A mosaic, this, that has sparked the imagination of artists and designers ...

Pictures: top, wall depicting the life of Sophia Loren made at the pizzeria "Ma Tu Vuliv A 'Pizz" in Gravina in Puglia (BA). Below, Digital Mosaic event for the promotion of "My Life on the Wall" Fuorisalone Via Tortona during Milan Design Week 2014.

The only limit is your creativity

With Mosaico Digitale ® you can enhance, modify and create any type of environment.

Images, shapes, distances, contents of the tiles: each element of the Mosaico Digitale ® is totally customizable.

What's more, each tile can be decorated and enriched with external elements such as Swarovski, gold leaves, coffee beans, stones and minerals.

Each tile is a canvas on which to express their creativity. Spaces become so personal and unique masterpieces.
