

2015 PRODUCT GUIDE

# GET SERIOUS. GET HOYT.

As the President of Hoyt, I love the fact that I wake up every day and go to work with employees who are as passionate about archery and bowhunting as I am. Walking into the office each morning I can count on working shoulder to shoulder with employees who put their hearts and souls into every product we build.

We love bows. We love everything about them. The flight of an arrow is what makes our world turn. While the rest of the world sleeps, we are awake at 4:00 am headed to our favorite ridge or treestand, or to capture a new idea on paper that just came to mind. The desire to innovate, design and build bows that lead the archery world fuels us every single day. We know when we accomplish this we are not only meeting our expectations, but more importantly, yours.

Our Engineering Team has never been busier in our research and development labs bringing inspiration and ideas to life. Our 2015 lineup of bows is proof of this relentless pursuit. Loaded from cam to cam with new, innovative and industry-leading technology such as our patent-pending Zero-Torque Cable Guard System, Offset Riser Technology, Modular Grip System and the fastest bows in the history of Hoyt, 2015 is dedicated to you. Because we know the most serious archers and bowhunters deserve the most serious equipment.

Get Serious. Get Hoyt.

## MODULAR GRIP SYSTEM (PATENT-PENDING)

Hoyt's new, patent-pending, modular grip system allows target archers to fine tune their grip pressure by changing the angle of the grip. Every Podium-X Elite comes with 4 different grip modules - 0 (standard angle), +2, +4 and +6 degrees. Try each one to see which angle helps you achieve a dead-center hold and best fits your shooting style and form.

## ADJUSTABLE CABLE GUARD BAR

The Podium-X Elite features an adjustable cable guard bar to help maximize your bow's tunability and shrink your groups. Four different angle settings help to neutralize torque and achieve perfect arrow flight. Internal locking teeth and two lock down screws ensure it will stay where you put it.
