IBIZA

Ibiza pools have been the most popular family swimming pools for a long time. Their popularity is due to the high quality of materials used and their elegant design, highlighted by the colourful mosaic of the wall. Thanks to their regular shape it can be easily combined with the pool enclosure, model Trend. The pool wall thickness is 0.8 mm and the pool liner thickness is 0.5 mm.

IBIZA

Advantages of Ibiza pools

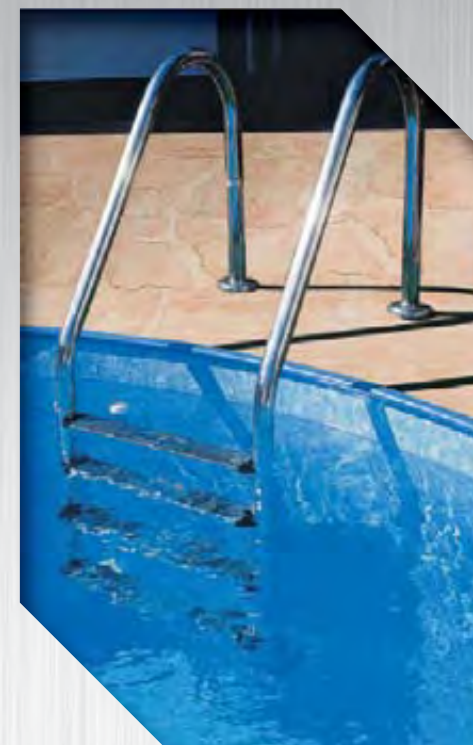

- ▶ Pool **wall** thickness **0.8 mm**
- ▶ Pool **liner** thickness **0.5 mm**
- ▶ Special anticorrosive plastic layer guarantees a long lifetime
- ▶ High quality liner with UV stabilizer and protection against chemical action
- ▶ Elegant design of liner mosaic
- ▶ Stainless steel steps with non-slip protection

Swimming pool construction

The walls of the swimming pool are assembled from thick-walled zinc-coated metal plates. In addition, they are protected by a special anticorrosive plastic layer and therefore guarantee the long-term operating lifetime of the swimming pool inserted in-ground. A high quality liner with a UV stabilizer forms the inner face layer of the swimming pool.

FIBREGLASS POOLS

CALYPSO

Fibreglass pools Calypso are one of the most popular family swimming pools. Thanks to the materials and technologies used, they are extremely strong but elegant and highly-developed. An indisputable advantage of these pools is their monolithic design. The integrated inner steps and the range of surface colour design will appeal to every customer.

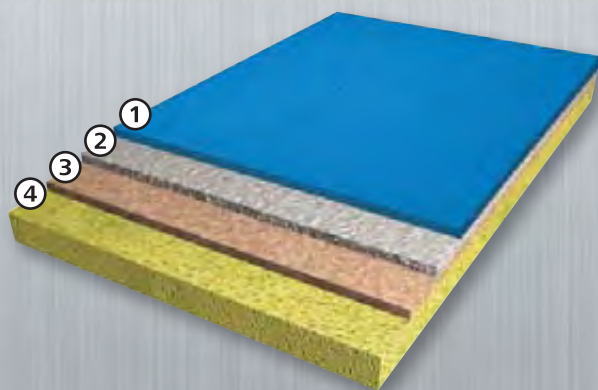

Advantages of Calypso pools

- ▶ Strong construction
- ▶ Monolithic design
- ▶ Integrated steps
- ▶ High quality surface and thermal insulation
- ▶ Easy construction preparation
- ▶ Easy mounting

High Quality Surface and Thermal Insulation

Inner surface of the pool is coated with a special Aqua-Guard paint. It provides an elegant design, strong protection against UV radiation and strong protection against chemical action. The external surface consists of a layer of hardened polyurethane foam, providing excellent thermal insulation and high strength.

- ① Colour Aqua-Guard with upper protective layer
- ② Layer of vinyl-ester resin
- ③ Reinforcement of fibreglass (laminated glass)
- ④ Thermal insulation (hardened PUR foam)

LAMELLAR swimming pool cover

The lamellar swimming pool cover with its easy and automatic operation is one of the best solutions for your swimming pool for energy savings and safety. The pool cover with its lamellar PVC slats prevents evaporation, so the heat losses will be minimum, which greatly reduces costs for water heating and dehumidifying indoor swimming pool lounges. The heat losses are 80-85% through the water surface of the pool.

Advantages of lamellar pools cover

- ▶ Remote control
- ▶ Easy installation and connection
- ▶ Minimum maintenance
- ▶ Elegant appearance
- ▶ Available only for rectangular pools
- ▶ All sizes possible

ENCLOSURES

SOLAR PROGRAMME

The solar heating panels, can be easily used for heating the water in the pool. It offers an useful efficiency, simple construction and easy insallation to each pool. In combination with the sand filter it provides the warm water for up to six months.

The solar shower is an indispensable supplement for each pool. The body of the shower works as a solar absorber and as water tank (up to 35 l) where the water is being heated.

ADDITIONAL EQUIPMENT FOR POOLS

UV-Lamps

- ▶ UV lamps effectively and safely disinfect water by using ultraviolet light.

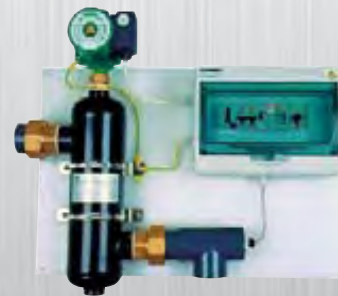

Salinators

- ▶ Electrolysis of salt water controlled by microprocessor produces natural chlorine which deals effectively with bacteria, algae and virus. The water is crystal clear and it does not irritate the skin or eyes. The concentration of the salt in the pool is 10 times lower than in the sea.

Water Exchanger

- ▶ The heat exchanger connected to a sufficiently powerful heat source is liable to transmit thermal energy into the water in the pool. The exchanger can be equipped with an automatic control system.

Electric Heating

- ▶ Electric water heater is the most effective pool water heating system. Automatic control provides optimal and reliable operation of the system.
