Pricing, delivery and other terms and conditions are those in effect at time of delivery.

Any and all riding stunts printed in this catalogue have been completed by professional riders in a controlled environment and are only possible with exceptional skill and experience combined with intensive training. Please do not under any circumstance attempt to replicate these actions!

HIGH- LIGHTS

HYDRAULIC CLUTCH ACTIVATION THANKS TO MAGURA HYMEC - FOR INCREASED SAFETY AND AN EASIER BIKING LIFE. NOW AVAILABLE FOR POPULAR MODELS SUCH AS THE YAMAHA MT-07 AND MT-09 AS WELL AS THE KTM 790 ADVENTURE.

**BUILT FOR THE ROAD AND AT HOME
ON THE RACETRACK** - THE HC3
RADIAL MASTER CYLINDER OFFERS
THE OPTION TO COLOUR CODE IT TO
MATCH YOUR MOTORCYCLE. THANKS
TO THE FULLY RADIAL DESIGN AND
THE PATENTED HCT PISTON TECHNO-
LOGY THIS WORLD CLASS MASTER
OFFERS UNIQUE PERFORMANCE AND
WE NOW OFFER FIVE COLOUR-KITS
TO ALLOW YOU TO PERSONALISE
WITH TWO DIFFERENT LEVER AND
RESERVOIR OPTIONS - YOU CAN
PERSONALISE THE HC3 FOR YOUR
MOTORCYCLE.

THE RADIAL FAMILY

HCT

POWERSPORTS
TECHNOLOGY

MADE FOR THE ROAD, AT HOME ON THE TRACK

BRAKE AND CLUTCH ACTIVATION BASED ON HC-TECHNOLOGY IS CURRENTLY AVAILABLE IN TWO DIFFERENT MODEL VARIATIONS. IF YOU CONSIDER YOURSELF TO BE A COMFORT LOVING TOURER, A RACER OR A CUSTOM BIKE FAN EVERY MOTORCYCLE RIDER WILL BENEFIT FROM THE HC-TECHNOLOGY AND MAGURA CAN OFFER THE PERFECT MASTER CYLINDER FOR ALMOST EVERY APPLICATION.

If you have ridden using the brake or clutch activation you will never want anything else thanks to the self designed and patented HC-Technology.

Where a racer requires maximum performance and control, a road rider values the safety and comfort offered by a MAGURA master cylinder.

The patented Hard Core Technology improves the precision of the activation, offers a constant pressure point and is built to last. These qualities are not only required on the racetrack but also play an important role for every road based rider.

The patented HC-Technology is used in the MAGURA radial and slanted radial master cylinder ranges. It improves the response characteri-

stics of your brake and clutch activation while reducing the seal wear inside your master cylinder.

This is made possible through the use of a stationary primary seal and a slotted piston. Besides the performance improvement and increased durability the technology also ensures that seal damage due to ABS kickback is no longer an issue. Every MAGURA HCT radial master cylinder is 100% ABS compatible. (Status Q4.2019)

Both the MAGURA HC1 and HC3 ranges benefit additionally from the „Advanced Seal Technology“. This innovation will reduce or eliminate secondary seal air ingress, as often experienced in race conditions under extreme loads.

POWERED WITH

HCT

POWERSPORTS TECHNOLOGY

REACH ADJUSTER

Set your lever at your preferred reach adjustment.

3 WAY LEVER RATIO ADJUSTMENT

Changes the the adjustable point of support to mimic the effect of changing the piston diameter by +/- 1 mm.

FOLDING LEVER

Avoids damage to the master cylinder in the event of a fall-over.

**MACHINED
ALUMINIUM BODY**

**PISTON AND
SECONDARY SEAL**

STATIONARY PRIMARY SEAL

Reduces the internal friction, improves the ABS activation. The key to our HC-Technology.

FEATURES OF OUR HC-TECHNOLOGY:

- Improved feel at the lever due to reduced internal friction
- Increased durability through the reduction of seal wear
- Less pulsation during ABS pressure compensation
- 100 % ABS Compatibility

TIPP

**MAGURA OFFERS A LOW-COST SERVICE REVISION.
THIS IS RECOMMENDED EVERY 10 YEARS OR
100,000 KM.**

STREET KING

HSC1

RADIAL MASTER CYLINDER

IF YOUR OWN REQUIREMENTS IN DRIVING DYNAMICS, SAFETY AND COMFORT ARE MORE DEMANDING AND YOU WANT TO MAKE A GOOD BIKE EVEN BETTER, THEN IT'S TIME FOR THE NEW HC¹ FROM MAGURA. THE DECISION TO OPTIMISE YOUR OWN MOTORCYCLE IS MADE EASY BY THIS COMPACTLY-DESIGNED RADIAL FITMENT.

STREET KING

HCT

APPROVED BY TWIN CUP GERMANY, EWA STUNTS,
ROK BAGOROS, HERCZEG BALÁZS MÓKU

AT A GLANCE:

- 100 % ABS-compatible
- Optimal lever kinematics
- Brake lever reach is individually adjustable
- Lever and cylinder parts are forged
- Direct pressure point, sensitive and powerful braking and clutch operation
- ABE included
(German approval documentation)

OPTIMIZED REACH ADJUST

ADVANCED SEAL TECHNOLOGY

DOT **OR** MAGURA BLOOD (CLUTCH)

DOT (BRAKE)

EASY BLEED

EASY MOUNT

VARIOUS RESERVOIRS

The feeling of a direct pressure point offers precision to your brake and clutch activation that benefit every motorcycle fan. If you have experienced the performance of a MAGURA radial master you will not want to use anything else in the future. Thanks to the slanted radial design the HC1 master offers benefits when the available space for the master cylinder is limited due to its compact size and shape.

As with all MAGURA products this ABS compatible radial master stands out by offering perfect ergonomics combined with excellent workmanship down to the last detail. The patented HC-Technology reduces the internal friction adding to the improved feel for your brake.

The HC1 is delivered with a pre-installed brake light switch and a remote fit fluid reservoir. As optional accessories we offer various fluid reservoir types, two different lever lengths as well as an optional mirror mount clamp.

SERVICE

To retain the full performance of your HC master cylinder we recommend a service revision through our MAGURA Service or from one of our certified service partners. This revision should be done following 100.000 km or 10 years of service.

HC1 BRAKE MASTER

DESCRIPTION	ORDER CODE
HC1 Brake Master Piston diameter 18 mm, long lever blade	2100453
HC1 Brake Master Piston diameter 15 mm, long lever blade	2100451
HC1 Brake Master Piston diameter 12 mm, short lever blade	2100452

HC1 CLUTCH MASTER

DESCRIPTION	ORDER CODE
HC1 Clutch Master Piston diameter 16 mm (for DOT), long lever blade	2100457
HC1 Clutch Master Piston diameter 13 mm (for DOT), long lever blade	2100489
HC1 Clutch Master Piston diameter 12 mm (for DOT), long lever blade	2100454
HC1 Clutch Master Piston diameter 13 mm (for mineral oil*), long lever blade	2100456
HC1 Clutch Master Piston diameter 12 mm (for mineral oil**), long lever blade	2100455

* Suitable for use with BMW and KTM mineral oil clutch activation systems.
** Suitable for MAGURA HYMEC applications.

OPTIONAL EXTRAS

(must be ordered separately)

- Short lever
- Mirror mount clamp
- Double banjo connector
for 2 brake lines
- Radial adapter for HYMEC pressure line
- Various reservoir options

ITEMS INCLUDED WITH DELIVERY

Every ready-to-mount HC1 is delivered with these package contents:

- Banjo bolt with sealing rings (M10x1)
- Remote reservoir
- Standard clamp (without mirror mount)
- Brake light or start safety switch
- ABE for brake fitments
- Owner's Manual

TAKE THE LEAD

HC3

RADIAL MASTER CYLINDER

BUILT FOR THE ROAD AND AT HOME ON THE RACETRACK. THE HC3 OFFERS THE PERFORMANCE WITHOUT COMPROMISE OF A 90° RADIAL MASTER THANKS TO OUR FULLY PATENTED HC-TECHNOLOGY. THE FEEL IS DIRECT AND EASIER TO CONTROL THAN ANY OTHER MASTER CYLINDER YOU HAVE RIDDEN WITH BEFORE.

TAKE THE LEAD

HLC3

APPROVED BY YAMAHA KLEIN, SASCHA SCHODER, AARON COLTON, MATTIE GRIFFIN, MEDAZA CYCLES, MARKUS VOLZ, RAPTOR RACING, RACEFOXX, RS RACING KIEFER RACING, DANNY MÄRTZ, LIONCRAFT, DIDIER GRAMS AND HORST SAIGER.

AT A GLANCE:

- CNC-machined aluminium housing
- 90° radial design
- 3-way adjustable lever bearing point
- 100 % ABS-compatible
- Folding lever
- Titanium fixing screws
- ABE included (German approval documentation) and reservoir-kit

3 WAY LEVER RATIO
REMAINS FULLY RADIAL
IN ALL 3 POSITIONS

ADVANCED SEAL
TECHNOLOGY

MACHINED
ALUMINIUM BODY

VARIOUS
RESERVOIRS

MACHINED CLAMP SUPPLIED
WITH TITANIUM RETAINING BOLTS

MACHINED ALUMINIUM BODY – this master cylinder body has been produced from high grade aluminium alloy to ensure a lightweight design combined with maximum rigidity which has been built to last.

90° FULL RADIAL DESIGN – Pushrod and cylinder at right angle to handlebar results in decreased friction and more direct brake feeling for improved control.

FULL ABS COMPATIBILITY – MAGURA “HCT” is approved for continuous use with all ABS systems without loss of performance due to pressure compensation (ABS-Kickback). (Status 04.2019)

3 WAY LEVER RATIO – The hand activated master cylinder lever has a clever 3 way adjustable point of support. This mimics the effect of using a piston size 1 mm below and above the selected hydraulic ratio. Simply remove and reposition the lever support retaining bolt for a softer or harder pressure point. All 3 positions offer 90° full radial activation.

FOLDING LEVER BLADE – Reduces the force exerted on the master cylinder body in the event of a fall over. This will increase the possibility to continue riding following a fall over incident.

ADVANCED SECONDARY SEAL TECHNOLOGY – The rear piston seal has been specially designed to prevent the introduction of air through secondary seal ingress. The advanced X-Ring seal design will reduce or eliminate this problem common on racing motorcycles at higher RPM.

RESERVOIR MOUNT – The master cylinder is supplied with an external reservoir and mounting bracket designed to use minimum space and with smoked glass to optically determine the level and condition of the brake fluid at all times.

TITANIUM RETAINING BOLTS – Lever and clamp retaining bolts are high grade titanium saving weight while remaining strong and durable.

AXIAL MASTER CYLINDER 167

APPROVED BY
BOANO RACING
(ENDURO GP)

167 HYDRAULIC BRAKE AND CLUTCH MASTER CYLINDER

Hydraulic brake and clutch control, one piece aluminium cylinder with reservoir, forged and break-optimised alloy lever blade, improved reach adjust, easy to fit with a folding clamp, the compact construction avoids collisions when riding extreme off road. The cylinder and lever blade pivot are protected against the elements with a rubber cap. Available for use with mineral oil or brake fluid.

THE RETROFIT HYDRAULIC
CLUTCH SYSTEM

HYMEC

SWITCH TO HYMEC AND ACTIVATE YOUR CLUTCH HYDRAULICALLY. OFF OR ON-ROAD, LONG TOURS OR ON YOUR FAVORITE STRETCH - WITH HYMEC EVERY RIDE IS IMPROVED AND UP TO 25 % LIGHTER TO ACTIVATE. A CLEARLY DEFINED AND CONSTANT PRESSURE POINT RESULT IN AN EASIER RIDE AND IMPROVED MOTORCYCLE CONTROL:

HYMEC

APPROVED BY HONDA RED MOTO,
DIRK MANDERBACH, MOTORRAD KLEIN,
MOTORRAD MEYER RACING

AT A GLANCE:

- Reduces the required hand-force during clutch activation
- Improves the feel at the lever
- Easy to mount
- Individually applicable
- Reduced maintenance thanks to lifetime fill

BREAKAWAY LEVER

The hydraulic clutch activation HYMEC is easy to mount and can be used to replace almost all cable clutch activation systems. The HYMEC reduces the activation force and ensures a constant pressure point for Off-Road and Street applications.

The benefits of HYMEC are well known among professional riders and successful teams such as the Honda Redmoto Enduro Team use the system on their Enduro GP motorcycles. This system has helped them to achieve numerous wins and a world title over the years.

Originally designed for use with Enduro and Motocross motorcycles the system has grown in popularity on the street as riders learned the benefits and advantages of the HYMEC. As a result the system has been continuously developed and is already available for a number of current models as a complete plug and play retrofit kit but is also widely used as an individually configurable accessory.

MAGURA HYMEC – AN EASY TO INSTALL ALTERNATIVE TO A MECHANICAL CLUTCH. THIS SYSTEM REPLACES THE CLUTCH LEVER AND CABLE – WITH A SMALL LIGHTWEIGHT HYDRAULIC SYSTEM FOR IMPROVED CLUTCH CONTROL.

OPTIONAL EXTRAS FOR YOUR HYMEC SLAVE CYLINDER

HYMEC-SLAVE-REAR CAP KIT:

Contains standard, rearmount and rearmount vario cap options.

ORDER CODE 2100018

NIPPLE ADAPTER KIT:

If your clutch cable has a large attachment nipple you will require a nipple for the end of your HYMEC slave cylinder activation rod.

**ORDER CODE
2701674**

Contains both an 11 and 14 mm attachment nipple adapter

A. REARMOUNT:

If your slave cylinder is attached with a rearmount together with any of the mounting adapters listed on page 52, pos. 28 you may require this REARMOUNT cap.

B. REARMOUNT VARIO:

This kit enables the fitment of the HYMEC slave cylinder STANDARD as a REARMOUNT VARIO option. The VARIO option allows for adjustment and extends the fitment length by 55 to 77 mm and can be used with all of the slave cylinders listed on page 29.

2 STROKE ATTACHMENT KIT:

If the HYMEC slave cylinder is located under the clutch cover it may be necessary to use one of the sleeves in conjunction with an o-ring.

ORDER CODE 2701697

REPLACEMENT HYMEC CLUTCH SLAVE CYLINDERS

If you have an older HYMEC clutch activation system and require a replacement slave cylinder but are not aware of the correct part number we have devised a method to make it easier for you to establish the part number for the replacement. Remove the slave cylinder from the motorcycle and activate the master cylinder until the slave cylinder activation rod is fully retracted and withdrawn. The piston in the slave cylinder is now contacting the bronze cap at the back of the slave cylinder and the rod length should be measured as shown on top of page 29. If the slave cylinder is no longer working it can be removed from the pressure line and forced slowly and carefully into the slave cylinder for the measurement.

Please note – the length you are measuring is not the activation length – the activation length is 16 mm longer than the withdrawn length. Following the measurement please do not disregard your old slave cylinder you may require the cap or the support. All of our replacement HYMEC slave cylinders are delivered with the standard cap and standard support as shown in the pictures. If the slave cylinder you require lies between two different activation lengths – always order the longer version and use spacers between the support and the cable attachment to increase the activation length to suit your motorcycle.

BUILD YOUR OWN HYMEC HYDRAULIC CLUTCH!

HYMEC is the solution for riders with small hands, reduced hand operating force and riders who require a precise clutch activation with a constant pressure point. Due to the number of enquiries we receive for HYMEC systems for motorcycles we have not measured, or have no ready to fit option for, we have completed this double page to assist you in the configuration of a new system. This should enable you to check if the system will fit your motorcycle and which parts list you will require to do so.

The MAGURA HYMEC-System is world renowned as a hydraulic conversion for cable operated mechanical clutch systems. The system is compatible with most clutch activations and offers a direct and constant pressure point. The advantages of this system are well documented in the press and riders forums.

WHAT DO I NEED TO BUILD A HYMEC FOR MY BIKE?

1. MASTER CYLINDER + 2. SLAVE CYLINDER + 3. PRESSURE LINE, FITTINGS AND OIL + 4. SPECIFIC SPARE PARTS

1. MAGURA OFFER 3 MASTER CYLINDER OPTIONS:

Master Cylinder – as the system requires mineral oil and cannot be used with brake fluid the master cylinder should be mineral oil compatible.

B	Pressure Line L=2500 mm cut to size	0722679	x	x	x
B	Pressure Line carbon L=1045 mm fixed length	0722138	x	x	x
B	Pressure Line carbon L=1120 mm fixed length	0722137	x	x	x
C	Banjo Bolt with Bleeder for slave	0722136	x	x	x
D	Service-Kit HYMEC (Fill and Bleed Kit)	0722152	x	x	x

Only one pressure line is required for every build. Please measure and define your required length before ordering.

* Max. Slave stroke refers to possible max. stroke with lever adjusted to largest reach position.

3. SLAVE CYLINDER

In order to ascertain the correct slave cylinder for your motorcycle you will need to cut the template slave cylinder from this page, fit to the motorcycle and cut to size. If you do not feel qualified to remove the clutch cable please seek assistance from your local motorcycle technician.

There are 2 basic forms of slave cylinder attachment:

1. STANDARD cable fitting: Slave template 1

2. REARMOUNT VARIO – Slave template 2

The REARMOUNT VARIO fitting can be adjusted to fit correctly using the rear locknut.

STANDARD template 1

REARMOUNT VARIO template 2

STANDARD

Carefully cut the template out and fit to your motorcycle. The clutch activation arm at the engine should be pushed with your finger as far forward towards the slave cylinder as possible and the template should then be cut at the next longest available point.

Then compare the number on the template to the list on pages 28/29 to pick the correct slave cylinder. If the slave is too long it can be shortened by placing spacer washers between the slave and the mounting point – if it is too short it will not work correctly. If in doubt choose the longer version.

REARMOUNT VARIO

Carefully cut the template out and fit to your motorcycle. The clutch activation arm at the engine should be pushed with your finger as far forward towards the slave cylinder as possible and the template should then be cut at the next longest available point.

Then compare the number on the template to the list on pages 28/29 to pick the correct slave cylinder – you will also require **ORDER CODE 2100018 REARMOUNT VARIO Kit** to mount the slave from behind. The threaded attachment kit at the rear should allow for sufficient adjustability when installing the slave cylinder.

POSSIBLE SLAVE CYLINDER DEVIATIONS

Some motorcycle models require a large nipple to attach to the clutch activation arm.

Some 2 stroke models have the cable fitted beneath an engine casing and require a special 2 stroke bracket.

ORDER CODE 2701674
Set with 1x 11 mm and 1x 14 mm

SPORT BRAKE LEVER 73

Sport brake lever for mechanical brakes (drum brakes).
Light weight forged alloy black split perch clamp and polished Eurostyle ball-end blade, 160 mm long, Ø 8.2 mm hole for rearview mirror.

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
B-lever 73.2	Thread 1/4" for brake light switch (0128496)	Nipple barrel, solder nipple, adjusting screw and protective cap	0116933

Technical data: Cable pull 20 mm | thread M7 for adjusting screw

SPORT BRAKE LEVER DUAL PULL 73.202

Sport brake lever for mechanical brakes (twin drum brakes).
Light weight forged black split perch clamp and polished ball-end lever, 160 mm long, Ø 8.2 mm hole for rearview mirror.

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
B-lever 73.202	Dual-cable pull, with equalizer, to operate two drum brakes	Soldernippel	0116934

Technical data: Cable pull 20 mm | thread M7 for adjusting screw

SPORT CLUTCH LEVER 74

Sport clutch lever, light weight forged alloy black split perch clamp and polished, Eurostyle ball-end blade, 160 mm long, Ø 8.2 mm hole for rearview mirror

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
C-lever4.1	Cable pull 20 mm at 3.9 ratio, HUSQVARNA, KTM, MAICO etc.	Nipple barrel, solder nipple, adjusting screw and protective cap	0116940

Technical data: Cable pull 20 mm | lefthand thread M7 for cable adjusting screw

PROTECTION CAP SET

Protection cap set for 73 Sport brake lever and 74 Sport clutch lever

MODEL	DESCRIPTION/APPLICATION	ORDER CODE
Protection cap set 73/516 ksz	Protection cap set for 73 Sport brake lever and 74 Sport clutch lever	0735083

CLUTCH LEVER 101

Clutch lever with clamp for tube-Ø 22 mm, with thread M6 for adjusting screw or supporting hole Ø 6.5 mm for cable.

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
C-lever 101.2.9	Black shank with thread for adjusting screw, black fibre reinforced lever blade, SPARTA	Adjusting screw, barrel, nipple	0117380 B
C-lever 101.4.8	Black shank with thread for adjusting screw, polished aluminium lever blade with stop notch	Barrel, nipple, s-nipple	0117421
C-lever 101.7.9	Black shank with supporting hole and thread for switch, black fibre reinforced lever blade with pull back spring, PUCH, TOMOS	Barrel, nipple	0117496 B
C-lever 101.8.9	Black shank with thread M6 and thread for switch, black fibre reinforced lever blade with pull back spring	Adjusting screw, barrel, nipple	0117514 B

Technical data: Cable pull | 18 mm, length of lever blade 125 mm, blade with ball end Ø 18 mm

BRAKE LEVER 108

Brake lever righthand for tube-Ø 22 mm, cable supporting hole, alloy lever blade or reinforced fibre lever blade.

MODEL	DESCRIPTION/APPLICATION	ORDER CODE
B-lever 108.4.9	Righthand, black fibre reinforced lever blade, thread for brake light switch, pull back spring, supporting hole	0119570

Technical data: Cable pull | 18 mm

DECOMPRESSION LEVER 12

Decompression lever, shank Ø 22 mm with supporting hole Ø 6.7 mm, cable fixing with clamp screw, cable pull 16 mm.

MODEL	DESCRIPTION/APPLICATION	ORDER CODE
Lever 12	Decompression lever, shank Ø 22 mm with supporting hole Ø 6.7 mm, cable fixing with clamp screw	0111370

Technical data: Cable pull | 16 mm

HYDRAULIC BRAKE AND CLUTCH LEVER 225

Hydraulic brake and clutch lever, black painted housing with a (22 mm) clamp, polished alloy lever, thread for brake light switch and hole Ø 8.1 mm or thread M8 for rear-view mirror, thread M10 x1, plastic brake fluid reservoir. Obtainable as righthand and lefthand model. Fitting brake and clutch switch see page 63

THROTTLE TWIST GRIP WITH MECHANICAL BRAKE 233

Single cable pulley throttle grip with mechanical brake lever. The throttle cable guide is open to enable external cable attachment. Folded and polished alloy lever.

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
Throttle twist grip 233.2.8	Housing painted black, grip black, folded and polished alloy lever. Suitable for Batavus, Hercules, Kreidler, Puch and Zündapp models.	Barrel, nipple and solder nipple	2100541

Technical Data: Cable pull | throttle 22 mm at a rotation of 75°, brake 18 mm

THROTTLE TWIST GRIP WITH MECHANIC BRAKE 273

Straight pulley throttle twist grip with brake lever blade, one cable pull (possibility for outer attachment), black painted housing with supporting hole Ø 6.5 mm or adjusting screw for cable, polished alloy lever or fibre reinforced lever blade with or without pull back spring, sliding clamp for screwing or for solder nipple.

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
Throttle twist grip 273.6.8	Black housing with thread for brake light switch, sliding clamp, PUCH	Barrel, nipple	0123953
Throttle twist grip 273.6.8	As above, but without accessories	–	0123954

Technical data: Cable pull | throttle 21 mm at a rotation of 104°, brake 18 mm

THROTTLE TWIST GRIP 307

Outer pulley throttle twist grip, single cable pull, straight cable up to 38 mm stroke, polished aluminium housing with trap door cover and adjusting screw for twist regulation, cable protection cover.

MODEL	DESCRIPTION/APPLICATION/VERWENDUNG	ACCESSORIES	ORDER CODE
Throttle twist grip 307.1	For general using	Solder nipple, grub screw, cable protection cover	0125600 B

Technical data: Total stroke | 46 mm at a rotation of 115° for handlebars Ø 22 mm and 7/8"

THROTTLE TWIST GRIP 309

Throttle twist grip, one cable pull, with big rotation, two part housing of reinforced poly-carbon, protective sleeve.

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
Throttle twist grip 309.1	With grip "Street", SIMSON, SACHS, KTM, ZÜNDAPP	Cable support, cap, solder nipple	0126003

Technical data: Total stroke | 50 mm at a rotation of 213°

THROTTLE TWIST GRIP 314

Motocross throttle twist grip with single cable, parallel pull. DUO-settings (Motocross or Enduro). Cable routed over roller for ease of pull. Black reinforced poly carbon housing, pro-grid rubber grip, quick and easy cable change, without removing housing. Can be changed to enduro setting.

MODEL	DESCRIPTION/APPLICATION	ACCESSORIES	ORDER CODE
Throttle twist grip set 314/029	In Motocross setting, with matching left grip	Solder nipple, rubber cable cover	0730218
Throttle twist 314	In Motocross setting without matching left grip	Solder nipple, rubber cable cover	0126386

Technical data: Total stroke | 48 mm at a rotation of 103°/91°

ELECTRIC THROTTLE TWIST GRIP 317

Housing made of glass-fibre reinforced plastics for tube-Ø 22 mm. Overall length 150 mm, max. current-carrying capacity 1 Watt, resistor and range of control of the potentiometer see below. Outer diameter of connection cable-Ø 6 mm, cable up to 3 seels.

MODEL	DESCRIPTION/APPLICATION	ORDER CODE
Throttle twist grip/Poti 317.2	5 kOhm-potentiometer, working rate 0-5 kOhm, cable length 800 mm	0026471
Throttle twist grip/Poti 317.4	5 kOhm-potentiometer, working rate 0-5 kOhm, cable length 1800 mm	2101014
Throttle twist grip/Poti 317.9	5 kOhm-potentiometer, working rate 0-5 kOhm, cable length 225 mm, with Molex-plug, for MuZ-Scooter "Charly"	2101015

Technical data: Rotation angle 75°

MASTER BRAKE CYLINDER 700

Master brake cylinder for foot controlled rear disc brakes, tubing fitting M10x1 to the brake calliper, without brake fluid reservoir, fitting for tubing connection to an external brake fluid reservoir.

MODEL	PISTON Ø IN MM	DESCRIPTION/APPLICATION	ORDER CODE
Master brake cylinder 700.33	16	Chrome painted housing, EML, KTM	0131411

Technical data: Stroke | 12 mm

SERVICE

MAGURA BIKE PARTS (MBP) WAS FOUNDED IN 1999 TO OFFER FIRST CLASS SERVICE TO OUR DEALER NETWORK COMBINED WITH SHORT DELIVERY TIMES AND A WIDE RANGE OF READILY AVAILABLE PRODUCTS. MBP CURRENTLY SUPPLIES OVER 20,000 DEALERS THROUGHOUT EUROPE. SINCE 2018 THIS SERVICE HAS BEEN EXTENDED TO MOTORCYCLE DEALERS WHO CAN PROFIT FROM THE SAME ADVANTAGES DEALING DIRECTLY WITH US:

HIGH PRODUCT AVAILABILITY

Short direct communication between supplier, dispatcher and logistics ensure that there is high product availability for our customers.

SHORT DELIVERY TIMES

Orders received up to 1PM are generally dispatched on the same day. The standard delivery time within Germany is 24h - within Europe 48h.

FAST SERVICE HANDLING

Service transactions are handled in-house within a 48 hour time-frame. This enables short reaction times and high flexibility.

QUALIFIED SERVICE PERSONEL

Our fully qualified service team are available to dealers and end-users for technical queries and problems – by Telephone and E-Mail.

Do you have any queries relating to MAGURA Bike Parts or our product range?
Contact us by E-Mail - info@magura.de or call us on +49 7125 9694460.

ARE YOU A MOTORCYCLE DEALER? BECOME A CUSTOMER!

YOU CAN BENEFIT FROM OUR NEW CUSTOMER DISCOUNT SCHEME!

1

STEP 1

Register online in our MAGURA B2B-Shop under magura-b2b.com.

2

STEP 2

After 2 to 3 days you will receive an E-Mail from MAGURA. Follow the instructions included to receive your access and to set up your own personal password.

3

STEP 3

You are now set up as a direct supply customer and can begin to order directly from MAGURA.

Should you have any additional queries our customer support team are available on week days between 8 AM and 5 PM and will be happy to assist.

Tip: If you decide to set up a SEPA direct debit authorisation you will receive a permanent additional 3 % discount on all orders.
